

THE ECONOMIC IMPACT OF

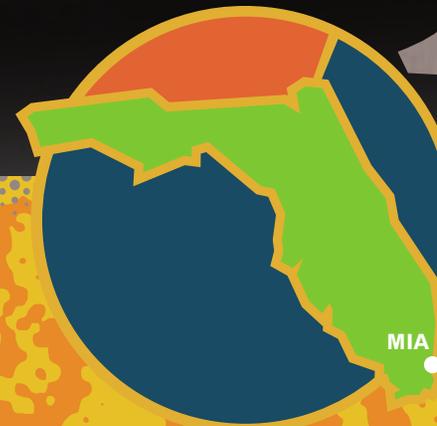

Miami

International Airport (MIA)

Aviation's Benefit for Florida

Florida's economic well-being is intrinsically entwined with its vibrant airport system and its robust aviation industry. The aviation system in Florida allows the state to capitalize on an increasingly global marketplace. Aviation in Florida both sustains and leads economic growth and development. Airports in Florida are important economic engines, and support vital health, welfare, emergency, and safety-related services.

Florida's system of commercial service and general aviation airports are important to businesses throughout the state. Air travel is essential to tourism, Florida's number one industry. Protecting and investing in airports throughout Florida will support the aviation industry and the economic benefits described in this report. With continued support, Florida's dynamic aviation system will continue to provide a significant economic return in the years to come.

MARCH 2010

Florida's Statewide Benefits from Aviation

Miami International Airport

Florida realizes significant annual economic benefits from aviation. The Florida Department of Transportation completed a comprehensive economic impact analysis to measure these benefits. Benefits measured in the FDOT study considered direct and indirect economic impacts and induced impacts that result from the multiplier effect. A summary of Florida's annual economic benefits from aviation follows:

Impact Category	Total Employment	Total Payroll	Total Output
Airports	158,861	\$7,752,561,600	\$28,793,238,700
Visitors Arriving by Air	753,353	\$19,315,252,400	\$59,178,047,200
Construction at Airports	25,321	\$1,041,077,200	\$2,858,791,800
Air Cargo	69,256	\$3,054,598,800	\$6,596,812,200
Aviation Education	6,977	\$201,195,400	\$573,188,000
Military Aviation	116,860	\$5,855,976,400	\$10,797,219,600
Aviation Businesses	35,986	\$1,255,264,800	\$5,321,292,400
Federal Aviation Administration	4,545	\$318,215,600	\$617,783,700
Total Annual Economic Benefits	1,171,159	\$38,794,142,200	\$114,736,373,600

Total annual economic output shown above represents more than 15 percent of Florida's gross state product (GSP). Many employers in Florida also rely on aviation to support their daily activities. Use of aviation helps to improve business efficiency. The FDOT study shows that, annually, by using all facets of air transportation, the efficiency of Florida businesses is increased by an estimated \$94.5 billion. This increased business efficiency is in addition to the total annual economic benefits noted above.

Miami International Airport is located on Florida's East Coast. The airport has four active runways, the longest of which is 13,000 feet. Facilities at the airport are capable of supporting a full range of commercial aircraft on all domestic and most international routes. The airport serves as the nation's gateway to Latin America and accommodates significant volumes of air cargo. The airport is capable of serving new large aircraft which may increase both passenger and air cargo activity.

Miami International Airport serves a mix of personal, leisure, and business-related travel. Approximately 17 million enplaning commercial passengers flow through the airport each year; nearly half of these enplanements are visitors, and many are international travelers, whose spending helps to contribute to the airport's economic impact.

Most of the airport's on-site tenants are dedicated to supporting the airlines, commercial passenger travel, and the air cargo industry. The annual economic impact of Miami International Airport is associated with direct impacts that come from tenants/businesses located at the airport and construction projects that are undertaken by the airport or by on-site businesses. Indirect impacts are associated with spending from visitors who arrive in the area via commercial and general aviation aircraft. The airport's total annual economic impact follows:
