Comments:

Everyone knows what Final Acceptance is, but now the language is changed to verification of the Incentive-Disincentive Completion Date. The Contractor will now need clarification of when this new date is. I don't even know what it means.

Comments:

The Specifications appear to be well written, however some of the sentences are lengthy, for example the first sentence in (4) is 252 words long. It appears that they could be broken down to multiple sentences, by individual thoughts. Overall the topic is well covered and thought out.
