Comments: (6-5-15 from Internal Review)

I think to be consistent with 108, the word protection should be maintained. Section 108 says that Contractor should preserve property in accordance with 7-11 and also to use methods to protect property: these are protection activities. If we only say monitoring in 455, a wise contractor may argue that the intent of 455 is just monitoring not to preserve/protect as stated in 108.

Response: The development team has taken this recommendation into consideration. It has been determined that the proposed use of “Monitor” is appropriate and will remain.
