676-2.2.1 - should we ask for one electronic copy as well, to facilitate long-term storage of the document?

Response: No electronic copy is needed.

Will the requirement for paper documents here be overridden by the second paragraph of the proposed changes to 4-1?

Response: No, Article 4-1 requires submittals to be electronic. The Specifications were modified to use the word “submit” when electronic submittals are required. Since this Section requires the Contractor to “provide” the paper copies, an electronic submittal is not required.
No changes made.
