Comments: (11-13-15)

We need to modify Subarticle 701-5 to match the other notification specs – like 711-5, see below. Spec 701 was modified early on before we decided to change the Contractor’s Responsibility for Notification requirement in each of the pavement marking specs. Should we just enter this as a comment?

701-5 Contractor’s Responsibility for Notification.
Notify the Engineer prior to the placement of the materials. **At the time of notification, submit a certification to** ~~Furnish~~ the Engineer **with the APL number** ~~manufacturer’s name~~ and batch **or Lot** numbers of the thermoplastic materials and retroreflective elements or glass spheres to be used. ~~Ensure that the batch numbers appear on the thermoplastic materials and retroreflective elements or glass spheres packages.~~

711-5 Contractor’s Responsibility for Notification.
Notify the Engineer prior to the placement of the materials. **At the time of notification, submit a certification to the Engineer with the APL number and the batch/ or Lot numbers of the thermoplastic and glass spheres to be used.** ~~Furnish the Engineer with the manufacturer’s name and batch numbers of the thermoplastic materials and glass spheres to be used. Ensure that the approved batch numbers appear on the thermoplastic materials and glass spheres packages.~~

Response: Agree.
Changes made.

In Section 701-5, the requirement to identify the product name and APL number needs to be added. Manufacturers can have multiple products on the APL so without that information, tracking will not be possible.

Response: Agree. See modifications above.
Changes made.
