Comments: (12-1-15)

The second sentence should be expanded to state: At the time of notification, submit a certification, in accordance with Section 6, to the Engineer with the APL number and the batch/Lot numbers of the materials and glass spheres or retroreflective elements to be used.

Response: Referring to Section 6 does not serve any purpose. The Section 6 reference to Contractor certifications states the Contractor shall provide certifications in accordance with the Specs.

No changes made.
