Comments: (11-13-15)

I noticed that 706-5 and 713-5 does not require a certification to be submitted. To be consistent with all of the other pavement marking specifications should a certification be required for these two sections?

Response: Because the packaging for RPMs and tape will be delivered to project site, the APL/Batch numbers will be on the package itself.  
No change made.

Comments: (12-1-15)

The second sentence should be expanded to state: At the time of notification, submit a certification, in accordance with Section 6, to the Engineer with the APL number and the batch/LOT numbers of the thermoplastic and glass spheres to be used.

Response: Referring to Section 6 does not serve any purpose. The Section 6 reference to Contractor certifications states the Contractor shall provide certifications in accordance with the Specs.  
No changes made.
