B.S. Civil Engineering, The Ohio State University, 1956
M.S. Civil Engineering, The Ohio State University, 1964

Professional Registration

Florida (45247), Colorado (15646)

Key Qualifications

Bill Ashton has fifty-seven years of varied engineering experience, primarily in construction management. He spent twenty-seven years in contracting, building roads, bridges and industrial facilities in various parts of the U. S. In this role he managed projects from the planning and estimating phase through procurement, scheduling and field operations to final closeout.

He has worked with and for DOT's as well as several of the largest contractors and construction/program management companies in the world. He has served in a leadership role with each of these firms.

In addition he served with the Navy Civil Engineer Corps, retiring as a Captain, and taught construction management courses at Colorado State University.

Other important experience areas include constructability and claim reviews, scheduling, project risk and quality analysis.

Because of this extensive and diverse experience he brings a unique perspective to resolution of project issues.

Specialized Training

Associated General Contractors Advanced Management Program, Dallas, TX, 1988.

Certificate in Financial Management, The University of Denver, 1987.
