

GLENN N. IVEY, P.E.
1460 Shorewood Dr. Lakeland, FL., 33803
863-559-9549 EMAIL: gnivey@aol.com

Years of Experience

48

Education

Bachelor of Civil Engineering, Auburn University, 1970

Professional Registrations

Professional Engineer: Florida, 1975 (21345)

Professional Affiliations

Dispute Review Board Foundation;

American Society of Civil Engineers, 355685

Florida Engineering Society/National Society of Professional Engineers, 3001772

Qualifications/Certification/Training

Construction Training/Qualification Program (CTQP):

- Quality Control (QC) Manager

Florida Department of Transportation (FDOT) and other Certifications/Training:

- FDOT Consultant Construction Engineering and Inspection (CEI) Project Manager Training
- Florida Transportation Technology Transfer Center, Advanced Maintenance of Traffic (MOT) Training
- Disputes Review Board Administration and Practice

Key Qualifications

Glenn Ivey is a senior supervising engineer with nearly four decades of experience in construction contract administration and management, contract inspection, and construction quality control and quality assurance for highway and bridge projects. Other areas of experience include maintenance bridge inspection, geotechnical engineering, drainage design, and service on dispute boards as member and chairperson.

Chronology of Related Work History

- Present – 2000
Active participation in the dispute review board process.
- 2018-2009 Parsons Brinckerhoff/WSP
Retired from WSP in October 2018 as Senior Project Engineer after completion of a project in District 7 at I-75/I-4 on the NB ramp from EB/WB I-4 to I-75 south of Tampa Bypass Canal. Two other significant projects were also complete within this time frame, on US 19 in Pinellas County from Whitney Road to SR60 in Clearwater and I-275 from Himes Avenue to Hillsborough River. The scope of work on US 19 was expansion and conversion to a controlled access facility and on I-275 was reconstruction and expanding an urban interstate in Tampa.
- 2008-2000 KCCS (Kissinger Campo Construction Services)
Leader of consulting engineering and inspection firm involved in the performance of construction engineering and inspection services on transportation projects in Florida and North Carolina.

- 2000-1998 Sverdrup Civil/Jacobs Engineering
Management of consulting engineering and inspection efforts involving performance of construction engineering and inspection services on transportation projects in Florida.

- 1998-1970 Florida Department of Transportation
Twenty-eight-year career included engineering involvement in:
 - FDOT Professional Engineer Training, 2-years internal FDOT training specifically for prospective professional engineer employees.
 - Transportation drainage design
 - Functional and structural safety highway bridge inspection, load rating and repair recommendations
 - Acquisition of soil and foundation data for preparation of engineering reports for use in design of highway and structures foundations
 - major bridge project (Sunshine Skyway Bridge) from test pile project thru main piers foundations as Project Engineer
 - performing management of the construction engineering and inspection consultant for the construction and erection of the cable stayed segmental main span, high approach spans and construction of the trestle sections on both approaches
 - construction contract administration in district construction offices in District 1, District 7 and the State Construction Office as liaison with District 4 during I-595 construction
 - district operations management including construction administration as well as responsibilities for highway maintenance operations and traffic operations.
