## What types of entries do we need to make in CIM?

- 1. Value Added Features.
- 2. Scheduled inspection dates.
- 3. Actual Inspection dates .
- 4. Adding accurate inspection notes.
- 5. Design Build Value Added Features.

# VALUE ADDED SPECIFICATIONS

- At this time the Project Administrators or Warranty Coordinators will need to enter the Value Added and Performance Based Warranty items.

In the future maybe they will be put in automatically.

## Performance Based, Warranty and Guarantee Specifications

Title	Description
Value Added Asphalt Pavement	The Contractor is responsible for the performance of the value added asphalt pavement constructed for a period of three years after final acceptance of the project, including continued responsibility for performing all remedial work associated with pavement distresses exceeding threshold values. Failure to meet the requirements of the Specification will result in the suspension, revocation, or denial of the Contractor's Certification of Qualification for a minimum of 6 months. This Specification has been implemented Statewide.
Value Added Portland Cement Concrete Pavement	The Contractor is responsible for the performance of the value added Portland cement concrete pavement for a period of five years after final acceptance of the project, including quality control, production, placement, consolidation, testing and inspection of all concrete mixtures. Failure to meet the requirements of the Specification will result in the suspension, revocation, or denial of the Contractor's Certification of Qualification for a minimum of 6 months. This Specification has been implemented Statewide.
Value Added Bridge Components	The Contractor is responsible for the performance of the value added bridge components for a period of five years after final acceptance of the project. Failure to meet the requirements of the Specification will result in the suspension, revocation, or denial of the Contractor's Certification of Qualification for a minimum of 6 months. This Specification is used mostly in Design Build Projects.  <b>NOTE: THIS SPECIFICATION MAY NOT BE USED ON ANY FDOT PROJECT WITHOUT AUTHORIZATION</b>
Performance Turf	The Contractor is to establish a growing, healthy turf over all areas designated on the plans using sod in areas designated on the plans and using seed, hydroseed, bonded fiber matrix, or sod in all other areas. The Contractor must maintain turf areas until final acceptance of all contract work. Failure to meet the requirements of the Specification will result in the suspension, revocation, or denial of the Contractor's Certification of Qualification for a minimum of 6 months. This Specification has been implemented Statewide.

# Entering Actual Inspection Dates

Click on box in Actual Inspection Date dialog box and calendar will drop down.

Navigate to needed date and click on to enter into Actual Inspection Date box. Then click Update.

The screenshot displays the 'Contract Information & Monitoring' interface. The top navigation bar includes 'Contract Information & Monitoring' and 'Current User MT510LS'. The main content area is divided into two panels. The left panel shows contract details: 'Way Section 77120000', 'Year 2007', 'District 05 | FIFTH', 'SiteManager Contract Type CLS | Construction Lump Sum Contract', 'Flair Contract Type CRS CONTRACTS', and 'Contract Location SR 434 FROM RANGELINE ROAD TO GRANT AVE'. Below this is a table of inspections with columns for 'Scheduled', 'Actual', and 'Status'. The row for '02-09-2010' is highlighted in green. The right panel shows a table of 'Value Added Features / Inspections' with columns for 'Description', 'Scheduled', 'Actual', and 'Status'. The row for 'ANNUALLY 02-09-2010' is highlighted in green. Below this is a form for 'Inspection Interval' (YRLY | ANNUALLY), 'Begin Date' (02-09-2009), 'End Date' (02-09-2011), 'Scheduled Inspection Date' (02-09-2010), and 'Actual Inspection Date'. A calendar for January 2010 is displayed below the 'Actual Inspection Date' field. The calendar shows dates from 27 to 31. The 'Actual Inspection Date' field is currently empty, and the calendar is open. At the bottom of the form are 'Update' and 'Cancel' buttons. The 'Inspection Result' dropdown is set to 'Please Select'.

## ASPHALT VAF / Problem Detected & Good Documentation of Actions taken.

<b>Contract #</b>	T5173		<b>Vaf #</b>	ASPF-1
<b>Lead Finproj</b>	415555-1-52-01		<b>Vaf Type Descp.</b>	Asphalt Pavement - Sect. 337/338
<b>District</b>	05   FIFTH		<b>Vaf Begin Date</b>	09-15-2008
<b>Contract Location</b>	I-75 FROM SUMTER CO LINE TO .8 MILE S OF SR 200		<b>Vaf End Date</b>	09-15-2011
<b>Feature Description</b>	Asphalt Value Added, Inspect Yearly for a period of three years per specifications			
<b>Feature Notes</b>				
<b>Added By</b>	<b>Added On</b>	<b>Feature Note</b>		
CN512DR	11-10-2009	On 11/5/2009, Anderson Columbia removed and replaced the rutting asphalt at the Southbound Weigh in Motion scale for 921 feet of Structural Asphalt. On 11/06/2009, the contractor replaced the FC -5 on the same area stated above. This completed the repair work for this issue.		
CN512DR	10-26-2009	Notified on 10/08/2009 from Motor Carrier Compliance of an asphalt issue at the Southbound Weigh in Motion Scale ramp. Ronda Daniell reviewed and sent information to the Contractor Anderson Columbia.		
CN512DR	10-26-2009	Contractor returned with they would remove only 775 feet of the 921 feet. Due they determined the problem was with the drainage system. The Department desilted 75 feet of the pipe and videoed the pipe. There were no issues with the pipe failing in the area of which the rutting was happening on the Southbound exit ramp. This work was performed on 10/14/2009. The Department took pictures on 10/15/2009.		
CN512DR	10-26-2009	On 10/21/2009, the Department Materials office cored the asphalt ramp in the areas of rutting. The materials office determined that the sturctural asphalt was indeed moving and that no underlying course was causing the rutting on 10/22/2009. On 10/23/2009, Contractor stated they will be removing the entire 921 feet.

Questions?  
Is the system working for you?  
How can the inspection process be improved?  
Suggestions/comments will be compiled and sent to the Central Office as District Five suggestion(s)

***Send comments and suggestions to me or Mike Wright. We will compile and send to the Central Office.***

**Recommendations/Suggestions**

- Leesburg Operations (Joe Remic's suggestions ).
  - 1. Is it possible to restrict the CIM auto-report feature to a specific range; such as unique individual or grouped Cost Centers?
  - For example, working in District 5 - Leesburg Operations, is Lake & Sumter Counties, or Cost Centers 515 & 592. These are the only notices needed regarding any "advance" and/or "past due" inspections.
  - 2. The CIM system software should provide the Cost Center number(s) at the beginning of the email subject line.
  
  - District Office (Larry, Mike suggestions).
  - 1. Program CIM to send notices to select Cost Centers in each District i.e. 509, 512, 514 etc.
  - 2. Program the Value Added Features in CIM based on the Pay Item Numbers. Each Pay Item could generate the intervals, and number of inspections to be made. Allow for ability to over-ride for different circumstances.  
338 Asphalt Pavement= 3 inspections performed annually, 335 Portland Cement Concrete Pavement= 5 inspections performed annually. Performance Turf= 1 inspection performed annually, Performance Based Pavement Markings, etc.
  - 3. When entering Feature Begin & End Dates, make calendar date year to year as well as month to month.
- Loreen Bobo suggests:**
1. Add a line for Maintenance Cost Center, and change the title of the current 'Cost Center' line to 'Construction Cost Center'.

# THE END
