

ASPHALT WARRANTY TASK GROUP MEETING
MINUTES

Monday, April 14, 2003: 8:30 AM to 3:00 PM
Conference Room 348
Burns Building, FDOT
Tallahassee, Florida

* * * * *

ATTENDANCE:

Nour Nazef	State Pavement Evaluation Office
Gale Page	State Materials Office
Bruce Dietrich	State Pavement Design Office
David Sadler	State Construction Office
David Wang	State Construction Office
Duane Brautigam	State Specification Office
Greg Schiess	Federal Highway Administration
Jim Warren	ACAF
Ken Murphy	Asphalt Tech. Inc.

1. **Introduction** – David opened the meeting at 8:40 AM and reviewed the agenda items with the Group members. He pointed out that the major task of this meeting is to finalize the Materials and Workmanship (MW) Guaranteed Specification including Table 338 – 1 and Table 338-2 for Industry review by May 1, 2003.
2. **Review previous Minutes of Meeting** –Group members reviewed the minutes of the last meeting, held on March 6, 2003 in Gainesville. No objections were voiced.
3. **Final review of Table 338-1 and Table 338-2 for MW Guaranteed Specification with a guarantee period of 3 years** – Based on the conclusions of the last meeting, the Group reviewed in detail the draft of Table 338-1 prepared by Duane and the draft of Table 338-2 prepared by Greg. During the review, the contents of the tables were modified and the Group came to an agreement on the final version as shown on the attachment. In order to clearly define the threshold criteria for Raveling, Segregation and Bleeding, the Group reviewed the pictures in the Distress Identification Manual for the Long-Term Pavement Reference Project published by National Research Council (SHRP-P-338) and selected Picture no. 41 for Raveling. For Bleeding, it was decided that David Sadler would request D2 A1A Project Office to take some pictures from the job site and

share with the Group members in order to select a final bleeding picture for specification use. For segregation, Greg will provide a testing method to determine threshold criteria for remedial work.

4. **Final version of the MW Specification (Section 338)** – The Group reviewed the draft copy of Section 338 prepared by Duane and some comments were added to the Section during the discussion. The final version ready for Industry review is attached for your reference.
5. **Review the Flow Charts for the implementation of CGAP D/B project (5 years) and MW specification (3 years)** – Since the Flow Charts were developed by several members at a separate meeting (held on March 18, 2003 in Tallahassee) and will be used by the District Offices as a guidance for the implementation of CGAP specification, the Core Group decided not to review them again but recommended to combine the 3-page flow charts into one flow chart to be presented on one single page. David Wang will revise the Charts and e-mail the revised Chart to the members for information purposes.
6. **Section 8-3 Statewide Disputes Review Board** – David Sadler shared the draft of Section 8-3 with the members. Due to the time constraint, it was decided to let the Group review the draft later and provide comments to David by the 24th of this Month.

The Meeting was adjourned at 2:30 pm.
