

Drilled Shaft Inspection and Pile Driving Inspection

Technical Review Team (TRT) meeting minutes

February, 19, 2014

The TRT met via teleconference at 10:00 am, February, 2014 to discuss the following items:

1. Requests for Application for instructor of Kumar Allady

The following TRT members were present at the teleconference:

Terry Puckett
Same Weede
Chandra Samakur
Matthew Gisondi
Juan Castellanos

There were some technical difficulties with the telephone line. The problems were resolved and the meeting started officially at 10:15 am.

Only one application was reviewed and considered in the meeting: the Application of Mr. Kumar Allady to teach the Drilled Shaft Inspector and Pile Driving Inspection courses. The application of Mr. Al Sevcech to instruct Pile Driving Inspection has been placed on pending status by the State Construction Training Administrator until the additional information we requested is submitted. We have not received a revised resume as of today and therefore we will not discuss this application.

Kumar Allady Application: Kumar Allady has submitted an application to be considered as a Instructor of the Pile Driving Inspector and the Drilled Shaft Inspector classes. Mr. Allady participated in the meeting and presented his experience to the team. Mr. Allady recognized that he does not meet the three year field experience requirements and requested that the requirements be revised. The team disagreed. The team unanimously ruled as follows:

-The submitted resume of Kumar Allady indicates that he does not possess the required minimum three (3) years of field experience of pile driving installation. The resume also indicates that he does not possess the required minimum three years field experience of drilled shaft installation. Therefore the Team did not approve him as instructor for the Drilled Shaft Inspection class or the Pile Driving Inspection class.

Meeting was adjourned at 10:45 AM.
