CAREER SUMMARY

Twenty eight years of experience in Construction Engineering and Management of major transportation infrastructure projects throughout the U.S. Performed hands on management as Construction Resident Engineer representing owners as well as Sr. Project Manager for contractor. Predominant projects include multi-million dollar road and bridge construction and rehabilitation projects in Florida, Connecticut, New York and Illinois. Projects include major steel and concrete bridges as well as fixed and moveable bridges, major roadway, utility and airport projects; this includes conventional bid, Design Build and Lump Sum deliveries. Prepared and presented numerous DRB Position Papers for both owners and contractors. Possess a Bachelor of Science in Civil Engineering and a Florida Licensed Professional Engineer as well as hold a Juris Doctorate in Law, although not a licensed attorney. Certified through Dispute Resolution Board Foundation as both DRB Member and Chairman.

CAREER HISTORY

Owner EJM Consulting Services, LLC: private, independent consultant to contractors, engineers, owners and attorneys providing construction management, claims management and preparation, project assessments, litigation support, alternate dispute resolution hearings and specialty design engineering.

Senior Project Manager for Florida transportation contractor providing oversight and project management for the construction of multiple on-going major road and bridge transportation projects. Responsibilities included budget and production monitoring, profit/loss reports, subcontractor coordination, schedule development and progression, working closely with superintendents to ensure proper resource loading, contract administration including RFI's, claims, delays and unforeseen impacts.

Senior Project/Area Engineer for full service Florida consulting engineering company providing Construction Engineering and Inspection for major road and bridge construction projects. In my tenure I served as Senior Project Engineer on numerous FDOT transportation projects throughout Florida. Responsible for oversight of all Construction Engineering and Inspection on multi-million dollar transportation projects including high profile interstate construction, fixed and moveable bridges, complex utility involvement and highly sensitive environmental areas.
