**EXPERIENCE**

**President, David A. May & Associates, Inc., 01/98 - Present.** Established a civil engineering firm specializing in providing support for attorneys and appraisers in access management, eminent domain and construction litigation cases. Developed cures for damaged properties. Developed site plans and obtained necessary permits for commercial developers. Provided site, permitting, and access management analysis for realtors and developers. Served on Dispute Review Board for contractors and Florida Department of Transportation.

- Eminent Domain
- Cure Plans, Fee Review
- Site Circulation and Access
- Construction Litigation
- Dispute Review Board
- Program Management
- Access Management and Permitting
- Roadway Design
- Civil Site Design

**Vice President, Tampa Bay Engineering, 07/96 - 01/98.** Managed highway, drainage and Municipal engineering groups including all financial, marketing, supervision, and professional development. Converted units into profit centers. Implemented scheduling and budget control systems. Established basis for expanding the firm into transportation markets in other states. Participated in nationally significant major investment study in Hillsborough County which was intended to facilitate implementation of commuter and light rail service.

**District Secretary, Florida Department of Transportation, District One, 09/92 - 07/96.** Managed a 1,000+ employee District with an annual budget exceeding \$330 million. Responsibilities included:

- \$100 million annual program for roadways, bridges and public transportation
- plans production, right-of-way procurement
- representative for Hillsborough County Commuter Rail Authority
- planning and development of a five-year work program
- maintenance and preservation program for all facilities
- coordination with local and state legislatures and municipal planning organizations
- management of a \$35 million annual consultant program

Major successes included total reconstruction of the five-year work program with minimal impact to the public, management of the emergency reconstruction of a 327-foot bridge of I-75 in less than three weeks, professionalizing and refocusing the collective attitude of the District to become more customer-oriented.

**District Director of Operations, Florida Department of Transportation, District Seven, 02/91 08/92.** Managed all construction, maintenance, and traffic operations activities for the District. Administered a fixed-capital financial program including improvements to several field offices. Managed the construction of the new \$12 million District Office Building. Served as Department representative on Hillsborough County Expressway Authority.

Major projects included construction of the new Howard Frankland Bridge, the award-winning rehabilitation of the old Howard Frankland Bridge, and demolition of the old Sunshine Skyway Bridge.

David A. May, PE – Cont.

**District Project Management Engineer, Florida Department of Transportation, District Seven, 10/88 - 02/91.** Managed a \$45 million consultant program for the plans production and construction inspection for the District. Assisted in the development of a project-scheduling system and the work program development through scope and estimate refinements. Supervised general consultants to assist in program management.

Major successes included the development of this office from inception to 15 employees without missing scheduled delivery of plans, and the implementation of the general consultant concept for plans.

**Senior Designer, Florida Department of Transportation, District One, 10/87 - 10/88.** Supervised group of roadway and bridge designers and technicians. Project included major and minor urban and rural roadway and bridge rehabilitation, as well as special projects such as Skyway fishing piers and the demolition of the old Skyway Bridge. Also served as expert witness in eminent domain court proceedings.

**Drainage Engineer, Florida Department of Transportation, District One, 10/86 - 10/87.** Reviewed and approved applications for drainage connection permits. Investigated drainage complaints and recommended solutions. Implemented Rule 14.86, trained consultants, developers and department personnel in the requirements for the initial drainage rule issued by the Department.

**Plant Superintendent, Delaware Valley Mechanical Packing, 02/86 - 11/86.** Supervised all production for a mechanical packing manufacturer with fifteen employees and 33 packing braiders. Designed new plant and relocated equipment and workforce to Florida with only a three week shut down.

**Project Engineer, Mobil Chemical, 12/79 - 02/86.**

**Project Engineer, International Minerals and Chemicals Corporation, 06/77 - 12/79.**

**Development Engineer, Celanese Fibers Corporation, 06/75 - 05/77.**
