

G. Rob Elliott, Jr., PE

Senior Resident Engineer

Peachtree Corporate Center 6689 Peachtree

Industrial Blvd., Suite P Norcross, GA 30043

678/421-0080 or 727/423-2796

Mr. Elliott has over 10 years of experience in the management of multi-million dollar roadway and bridge construction projects. In addition, he has been a leader in the FDOT's QC 2000 and Construction Training Qualification Programs. Mr. Elliott has also served the FDOT in a variety of positions including Construction Project Manager, Assistant Consultant CEI Resident Engineer and Area Construction Engineer. He is a registered Professional Engineer in Florida and Georgia and holds qualifications in Asphalt Paving and Plant, Pile Driving Installation, Work Zone Safety and ACI Member. He is currently pursuing professional registration in Alabama and South Carolina. Examples of his past experience and expertise include:

EMPLOYMENT

- **12/00 - Present, Director/Regional Manager, Construction Management Division, Tampa Bay Engineering, Inc.** Responsibilities include availability as a Senior Resident Engineer on CEI projects in South Carolina. Also, perform day-to-day corporate operational duties as a Director/ Regional Manager of the Construction Management Division, provide schedule input and review, constructability/biddability review, claims analysis and recommendation and contract specification documentation and interpretation.
- **11/98 - 12/00, QC 2000 Program Manager, FDOT Central Office, State Construction Office, Tallahassee, Florida.** Coordinated and implemented QC 2000 Program, which is a paradigm shift for FDOT Construction and incorporates Contractor Quality Control as a part of acceptance. Provided guidance and expertise to implementation teams developing specifications. Managed University of Florida's Transportation Research Center contract, which developed and administers the Construction Training Qualification Program (CTQP) in aggregates, asphalt, concrete and earthwork. Assist with the refinement of FDOT's lab qualification, and independent assurance programs. Coordinated and facilitated meetings between top industry and department officials, called the QC 2000 Advisory Group.
- **09/97 - 11/98, Area Construction Engineer, FDOT Central Office, State Construction Office, Tallahassee, Florida.** State Construction Office representative for 18 counties in northeast Florida. Duties included being the liaison for the District with Federal Highway Administration (FHWA), industry and consultants, performing Quality Assurance Reviews of on-going construction projects and writing specifications and procedures.
- **02/95 - 09/97, Assistant Consultant CEI Resident Engineer, FDOT District Seven, Tampa, Florida.** Supervised personnel assigned to perform Quality Assurance and Construction Project Management duties. Coordinated and reviewed construction schedules for CCEI Resident Office. Developed Scopes of Service, was a Panelist on the Technical

Review Committee and negotiated staffing and equipment for consultant contracts. Coordinated and performed related duties for the automation of the CCEI Resident Office. Served as a representative for the FDOT in day-to-day activities with the FHWA, consultant firms, contractors and the traveling public.

- **02/93 - 02/95, Construction Project Manager, FDOT District Seven, Tampa, Florida.**

Managed CEI consultants on various FDOT projects throughout Hillsborough, Pinellas, Pasco and Hernando Counties. Duties included performing consultant evaluations, claim reviews, supplemental agreement processing, time extension approvals, and monitoring the daily operations of CEI consultants. Served as the Construction Project Manager on numerous projects including:

- SR 54 SPN 14570-3515
- SR 93 (1-75) SPN 08150-3404
- SR 600 (US 92) SPN 10130-3544
- SR 54 SPNs. 14140-3414/ 6415 and 14090-3501
- Motorist Aid Call Box Implementation Project
-

- **07/90 - 02/93, PE Trainee for FDOT District Seven, Tampa, Florida.** In this position, gathered an understanding of the role of FDOT and how the Department's work interrelate. Most of the training received came from operations, with a specialty phase in Construction. While in this position, served as:

- Project Engineer on SR 54 from US 41 to 4.0 miles East (Project involved milling and resurfacing, adding box culvert extensions and shoulder widening). Responsibilities included all aspects of construction engineering inspection with emphasis on supervision of project inspectors; record keeping; compliance with plans and specifications; preparation and submittal of project reports; weekly and monthly pay estimates; coordination with local utility companies; liaison for businesses and property owners to resolve any problems related to the construction work; and preparation and submittal of final estimates.
- Construction Project Manager on the following projects: SR 60 SPNs 10110-3565 10110-3563; SR 600 (US 92) SPN 10030-3509; SR 60 SPN 10110-3566; and SR 674 SPNs 10120-3511 and 10120-6516. Duties included performing consultant evaluations, claim reviews, supplemental agreement processing, time extension approvals, and monitoring the daily operations of CEI consultants.
