Dispute Review Board Foundation
Florida Engineering Society/Florida Institute of Consulting Engineers
TEAMFL - Transportation Expressway Authority Membership of Florida

SUMMARY OF EXPERIENCE

Mr. Smith has over 30 years of experience in construction operations and management for highway, bridge, airport, building, electrical, and municipal projects in South, and Central Florida. During that period he has participated at the highest levels of management in the placement of over 3/4 of a billion dollars worth of public works infrastructure. He has been responsible for field and office operations, project planning, project bids and price proposals, contract administration and negotiations, construction management, claims preparation, negotiation and litigation. He has been a leader in the industry in innovation and implementation of new technologies and concepts. He was the first contractor in the State of Florida to submit Value Engineering Change Proposals and leads the industry in the total number submitted and the highest single savings to date. State was contracted for, and completed the first Design Build project for the Florida Turnpike. Mr. Smith has championed the concept of "Partnering" to the Florida Department of Transportation and other Owners and through his efforts the first Partnering Session in the history of the FDOT was conducted with State Paving Corporation in 1991. Partnering is now a standard requirement with all FDOT construction contracts.
