CONSTRUCTION BULLETIN NO. 01-01 **This Bulletin has Expired**

TO : **DISTRICT CONSTRUCTION ENGINEERS**

FROM : Greg Xanders , State Construction Engineer

COPIES : Leroy Irwin, Donna Pope, Susan Laird

**SUBJECT: CPAM REVISION - CHAPTER 5, SECTION 2
 ENVIRONMENTAL COMMITMENT COMPLIANCE**

CPAM Chapter 5, Section 2 will be revised to agree with the language in the State of Florida Department of Environmental Protection General Permit For Stormwater Discharge from Construction Activities That Disturb Five or More Acres of Land (Part V.E.1., and NPDES General Permit, Section V.E.1.). These references require all contractors and subcontractors who have been identified in the Stormwater Pollution Prevention Plan (SWPPP) to sign a copy of the certification statement of the permit.

The contractor (s) and subcontractor (s) that will implement individual items of the SWPPP must be identified for that measure in the plan. For example, if silt screen, stone bags, hay bales grassing, etc. are measures identified in the plan, the contractor(s) or subcontractor(s) installing these items must sign the certification statement.

If you have any questions, please call Archie Montgomery at SC 994-4146.
