

## How to check Acquisition/Flexible Start Time

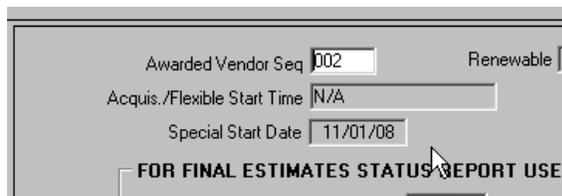

From the Main panel, open up Contract Administration, then open up Contract Records.

Next open up the Contracts icon and select your contract. Once you have your contract, click on the Generic Fields icon.

Even if the Contract has not been activated, you will not be able to change the Acquisition/Flexible Start Time or the Special Start Date. You will need to request a DB change to have the correct days or date entered.

To get out, just click back on the Generic Fields icon again.
