District One Construction

Proposal Number: T1450
Financial Project Number: 425226-1-52-01

Question	Response
The striping plans indicate pavement markings to be "TMM" (Traffic Marking Material). What type of material is required for striping indicated as Traffic Marking Material?	Answer Posted on 5/19/2011 @ 11:09AM: Final Surface pavement markings shall be thermoplastic markings.
An accurate earthwork quantity (cut / fill) cannot be calculated based on the cross sections provided in the plans because they are on 300 stations. Will you be providing a table for the earthwork excavation and import?	Answer Posted on 5/19/2011 @ 12:05PM: The plans provide adequate information to estimate earthwork quantities.
There is not enough information to calculate the tonnage for the overbuild based on the plan sheets. Will you be providing a table with the quantity for the overbuild? This project needs much more information to be a lump sum project.	Answer Posted on 5/19/2011 @ 12:07PM: The plans provide adequate information to estimate overbuild quantities for this project. The plans shall not provide a table with the quantities for the overbuild.
