MAJOR WORK TYPE: RESURFACING

Question	Response
<p>Posted May 19, 2011 at 5:06 pm</p> <p>1) On sheet 65 Traffic Control Plan note 19 states all trees and palms adjacent to construction activities shall be barricaded, unless designated to be removed. Is to included ever tree that is inside the right of way and what type of barricade is to be used? Where is the price for the tree protection to be included?</p>	<p>Posted May 20, 2011 at 11:48 am</p> <p>1) Tree protection is to be installed as per index 544 (sheet3). Payment shall be included under pay item 580-1-2 Landscape Complete - Large Plants.</p>
<p>Posted 5/20/11 at 5:30 pm</p> <p># 8 Pruning: This project has 103 live oaks to be installed along the shoulder of the road. The specification states that we will need to maintain the maintenance rating requirements and mast arm clearances, as well as horizontal and</p>	

<p>vertical clearances per index 546.This has been included into our cost analysis for the project.</p> <p>I have estimated that there are approximately 500 +/- existing trees that are located along the shoulder and in the medians.</p> <p>Question: Will we be responsible to Prune the existing material as well?</p>	
<p>Posted 5/20/11 at 5:32 pm</p> <p># 9 Tree Protection Barricades. States - All trees and palms adjacent to construction shall be barricaded, unless they are removed.</p> <p>I have estimated that there are approximately 500 +/- existing trees that are located along the shoulder and in the medians.</p> <p>Question: Are we to include all the trees/palms in the medians, and all the trees along the shoulder with the tree protection?</p>
