

## Correction to the April 25, 2012 Advertisement

T4332A & T4332B

### **QP2 CERTIFICATION**

This project requires the handling of lead based paint. The contractor shall conform to all federal, state and local regulations as appropriate when working with the existing bridge components coated with lead based paint. Painting comprises over 51% of the work for this project. Prior to bid document issuance, the contractor must provide evidence that the prospective bidder is currently QP2, category "A" certified.
