

Proposal Number: T1490
Financial Project Number: 425346-1-52-01

Question	Response
Is grinding an acceptable method for removing existing striping?	Answer Posted on 2/23/12 @12:56pm: Specifications Package Section 711-4.1 states Remove existing pavement markings such that scars or traces of removed markings will not conflict with new stripes and markings by a method approved by the Engineer.
It is of our interest to bid on the referenced project, however while going over the plans, specifically from Sheet No. 64 to 71 (Signing and Pavement Marking) the following question came to me: Question: The existing signs that are to be removed are they to be re-installed?, or the one that will be installed are to be furnished (new ones)?	Answer Posted on 2/24/12 @11:01am: There are two items for the signing. Item 700-20-60 is for removing the existing signs and Item 700-20-11 is for furnishing and installing a new sign panel with less than 12 square feet.
