District One Construction

Proposal Number: T1492
Financial Project Number: 429502-1-52-01

Question	Response
Sheet 5 the description for the conduit underground and the directional bore call for RHW-2 conductor. However, the plans (sheet 6 thru 12) call for #6 conductor to be install within the conduit. Please clarify which conductor is required.	Answer Posted on 2/24/12 @10:57am: RHW-2 is the type of conductors that are to be used. The size of the RHW-2 conductors are to be No. 6 AWG, with the exception of the No. 3 AWG conductors that run from the load center to the power service. See Keyed Notes on Sheet 13 for further clarification.
Is this bid to be submitted through bid express or paperwork?	Answer Posted on 2/24/12 @11:05am: The bid will need to be submitted through Bid Express
