Question:	9425: Pay item 660-4-11 (Video Detection-cabinet equipment) is incorrectly quantified the same as pay item 660-4-12 (Video Camera -overhead). The quantity for the in-cabinet equipment should only be (1) per intersection since there is only (1) cabinet per intersection. Will this be revised?	Posted:	3/18/2015 3:28:41 PM
-----------	---	---------	----------------------

Answer:	As outlined in the Basis of Estimates (BOE), the quantity for video detection equipment is based on a unit of each, not per intersection. In addition, the BOE also states that plans are to depict quantity and location for both cabinet and above ground equipment. As such, four cameras and four detector cards have been quantified for each location requiring video detection (one camera and one detector card per approach).	Status:	ANSWER PUBLISHED
