Question:	9059: In the special provisions on this project It calling out for a specific type Of Blue tooth device, Ethernet switch and devices for the traffic Control cabinets. Can we get a list of the specific equipment that will be required for this job? The main reason I ask these devices is that all of the cabinets are locked with a special key, we cannot access them unless we a orange county Rep there. What is the best way to handle this? Answer:	Bid Question Response #9059: The Bluetooth devices currently on the APL contain two Bluetooth vendors Bluemac (Digiwest) and Velocity (Iteris). Portions of the TSP may require the products to be modificationed by the contractor or vendor. Layer 3 switches are not devices which are put on the APL, therefore the switch just need to match the Technical Special Provisions. There are numerous devices that meet the requirements of the TSP. Please check the APL for media converters. At the time of this question only one items was listed.	Status: ANSWER PUBLISHED
