ADDENDUM NUMBER ONE

FINANCIAL PROJECT NO.: 431136-1-72-01
DISTRICT CONTRACT NO.: E1K53-R0
Okeechobee

Contractor,

You are hereby notified that the following Pay Items has been changed on the above mentioned contract.

Pay Item Number	Pay Item Description	Original Pay Item Quantity	New Pay Item Quantity
E104-4-2	MOWING (Slope)	120.00 acres	100.00 acres

Also, Attached is a corrected page number 24 of the Specifications.

Acknowledge receipt of this addendum in the space provided on the proposal.

Cheryl Sanchious
District Contracts Administrator

a list of the equipment and personnel to be utilized, prior to execution of the Contract.

ME104-40-2 Types of Mowing Areas.

ME104-40-2.1 General: The Engineer will determine the areas to be cut and type of mowing to be accomplished in each.

All hand labor required to perform the specified work around appurtenances will be incidental to the type of mowing being performed. Appurtenances include, but are not limited to, sign post and bases, delineator post, fences, guardrail, barrier walls, end walls, pipes, drainage structures, poles, guys, mail boxes, landscaped areas, and trees.

ME104-40-2.2 Large Machine Mowing: Large machine mowing encompasses the routinely mowed areas of shoulders, front and back slopes that are 3 horizontal to 1 vertical or less, roadside ditch bottoms, large median islands and similar areas conducive to the use of large machine mowing equipment.

ME104-40-2.3 Slope Mowing: Slope mowing is generally limited to slopes greater or steeper than 3 horizontal to 1 vertical and are relatively inaccessible to the use of conventional style equipment, e.g., steep slopes, wet roadside ditch bottoms, canal banks, intersections, overpasses, etc. These type areas will require the use of specialized equipment designed for slope mowing.

ME104-40-2.4 Intermediate Machine Mowing: Intermediate machine mowing consists of mowing areas not accessible by large machine mowing equipment but not conducive to the use of small machine mowing equipment. These areas consist of shoulders, roadside ditch bottoms, raised median islands, various width utility strips, and similar areas.

ME104-40-2.5 Small Machine Mowing: Small machine mowing consists of mowing areas not accessible by large and intermediate machine mowing equipment. These areas consist of narrow shoulders, landscaped shoulders, narrow roadside ditch bottoms, raised landscaped median islands, narrow width utility strips, and similar areas.

ME104-40-3 Frequency of Mowing.

The area and limits of mowing have been previously established and are distinguishable in the field. Where landscaping has been established or natural landscaping has been preserved, mow conforming to the established mowing contours. Mow up to the limits maintained by the Department and around existing appurtenances located within the roadway right-of-way as directed by the Engineer.

The Engineer will determine the type of mowing, the estimated number of acres to be accomplished within a specified number of calendar days (cycle), when to begin each mowing cycle, and the total number of cycles. Complete each mowing cycle within 20 calendar days of beginning the cycle, weather permitting. The approximate number of cycles for each type of mowing will be as follows:

Large Machine Mowing	<u>10</u> cycles (<u>N/A</u> <u>minimum</u> cycles)
Slope Mowing	<u>10</u> cycles (<u>N/A</u> <u>minimum</u> cycles)
Intermediate Machine Mowing	<u>12</u> cycles (<u>N/A</u> <u>minimum</u> cycles)
Small Machine Mowing	<u>12</u> cycles (<u>N/A</u> <u>minimum</u> cycles)
Mow Wildflower plots approximately	<u>N/A</u> times per year. Wildflower plots or naturally occurring wildflowers are to be avoided when in bloom and when re-seeding.
