Subject ADDENDUM 1 - Contract E5H91 Thermo Construction

ADDENDUM NO. 1

LETTING DATE: JUNE 7, 2005
CONTRACT NO.: E5H91
FIN NO.: 238007-1-52-06
COUNTIES: VOLUSIA AND SEMINOLE

On page 74 of the contract package, the Technical Special Provision should read "2 feet [0.6 m]":

702-4.2 Dimensions: Apply traffic stripes such that, after application of drop-on glass spheres, when measured in accordance with Florida Test Method FM 5-541, the thickness of the traffic stripes is a minimum of 0.155 inch [3.94 mm]. Ensure the thickness of the traffic stripes in the bottom of the profile is from 0.025-0.050 inch [0.635-1.270 mm]. Locate the individual profiles transversely across the full width of the traffic stripe at approximately 1.0 inch [25 mm] on center, with a bottom width between 0.095-0.310 inches [2.413-7.874 mm].

The audible transverse bar shall be evenly spaced in the marking at intervals of 2 feet [0.6 m] center to center. The bar shall have level tops nominally 2.560 inches [65.024 mm] long. The bar shall be a minimum of 0.395 inches [10.03 mm] and a maximum of 0.510 in. [12.95 mm] in height when measured above the normal top surface plane of the roadway.

I apologize for this oversight. Max Mercato [334-277-0237] of Rainline called me and noted the error. The Typical Section drawing is correct, but the Technical Special Provisions have priority over the Typical Section drawing. Therefore, the correction needs to be made before the bids are received.

Thank you,
Dave Schappel@dot.state.fl.us

Please sign below and fax to (386) 740-4208. If you have any questions, please give myself (386) 943-5525 or Dave Schappel a call @ (386) 740-34210.
