Question: There may be a discrepancy involving roadway id 92030000, an approximately 38 mile section of US 192 with shared maintenance responsibility between cost centers 590 and 594. A comparison of RCI summary MRP workloads reported at the cost center level (590 and 594) with workloads for the same roadway mileage reported at the roadway id level reveals a significant discrepancy. Could the Department please investigate this issue and if it needed issue a clarification to all proposers?

Answer: It appears that Section 92030 was left off of the cost center 590 workload. The combined workloads however did include this section. We took the opportunity to review the spreadsheet entirely and located some other minor errors. We have made the necessary revisions to the spreadsheet. The attached is the revised version for your use.
