**Major requirements of this project?**

The Consultant Team should be familiar with railroads, bridge design, structural issues, and geotechnical efforts relating to each. The Team should be capable of providing coordination with CSX personnel and also coordination with utility companies and with various permitting agencies. The Consultant Team should be able to handle possible contamination issues that may arise.

**Shortlist Consideration Factors:**

1. Past performance grades on Department projects.
2. Volume of work previously awarded within past five years.
3. Workload as evidenced by residual fees on active projects.
4. Distribution of work among competing consultants and utilization of new consultants.
5. Balancing needs of the project to the abilities of the consultants.
6. Consultant's working relationship with Department on previous projects.
7. General information (number of professionals, consultants total area of prequalification, location, subconsultant relationships, etc.)
