**Subject: Hurricane Recovery- Environmental Considerations and Coordination**

Attached is a memorandum and referenced attachments dated May 19, 2005 from Assistant Secretary Thibault that was sent to the District Secretaries and Directors. The memo provides some guidance and recommendations regarding the consideration and coordination of environmental concerns during hurricane recovery efforts.

This was discussed at the Environmental Administrators meeting held earlier this month. Much of the memo recommends increased coordination and communication with the District Environmental staff. This is provided for your information and for coordinating with the District Emergency Coordination Officer and could be used to update the District Comprehensive Emergency Management Plan if necessary.
