

Efficient Transportation Decision Making (ETDM) Process

ETDM Screenings to PD&E

Project Development &
Environment Training

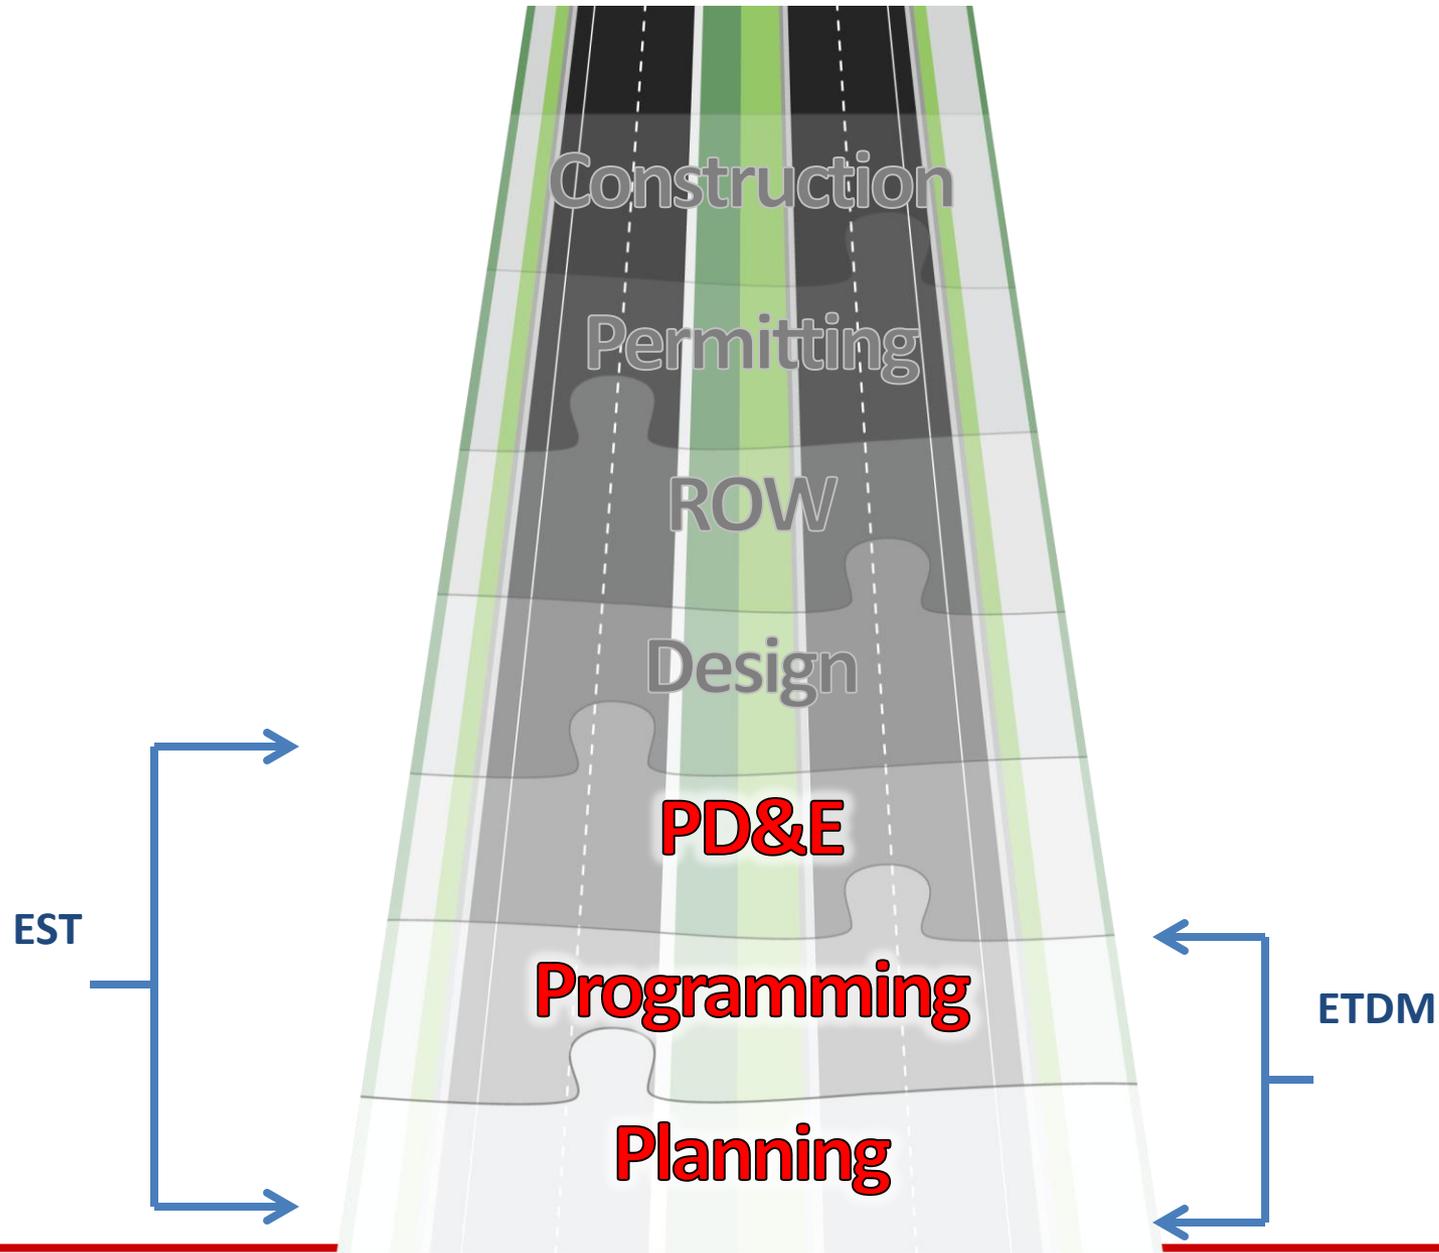

November 5, 2012

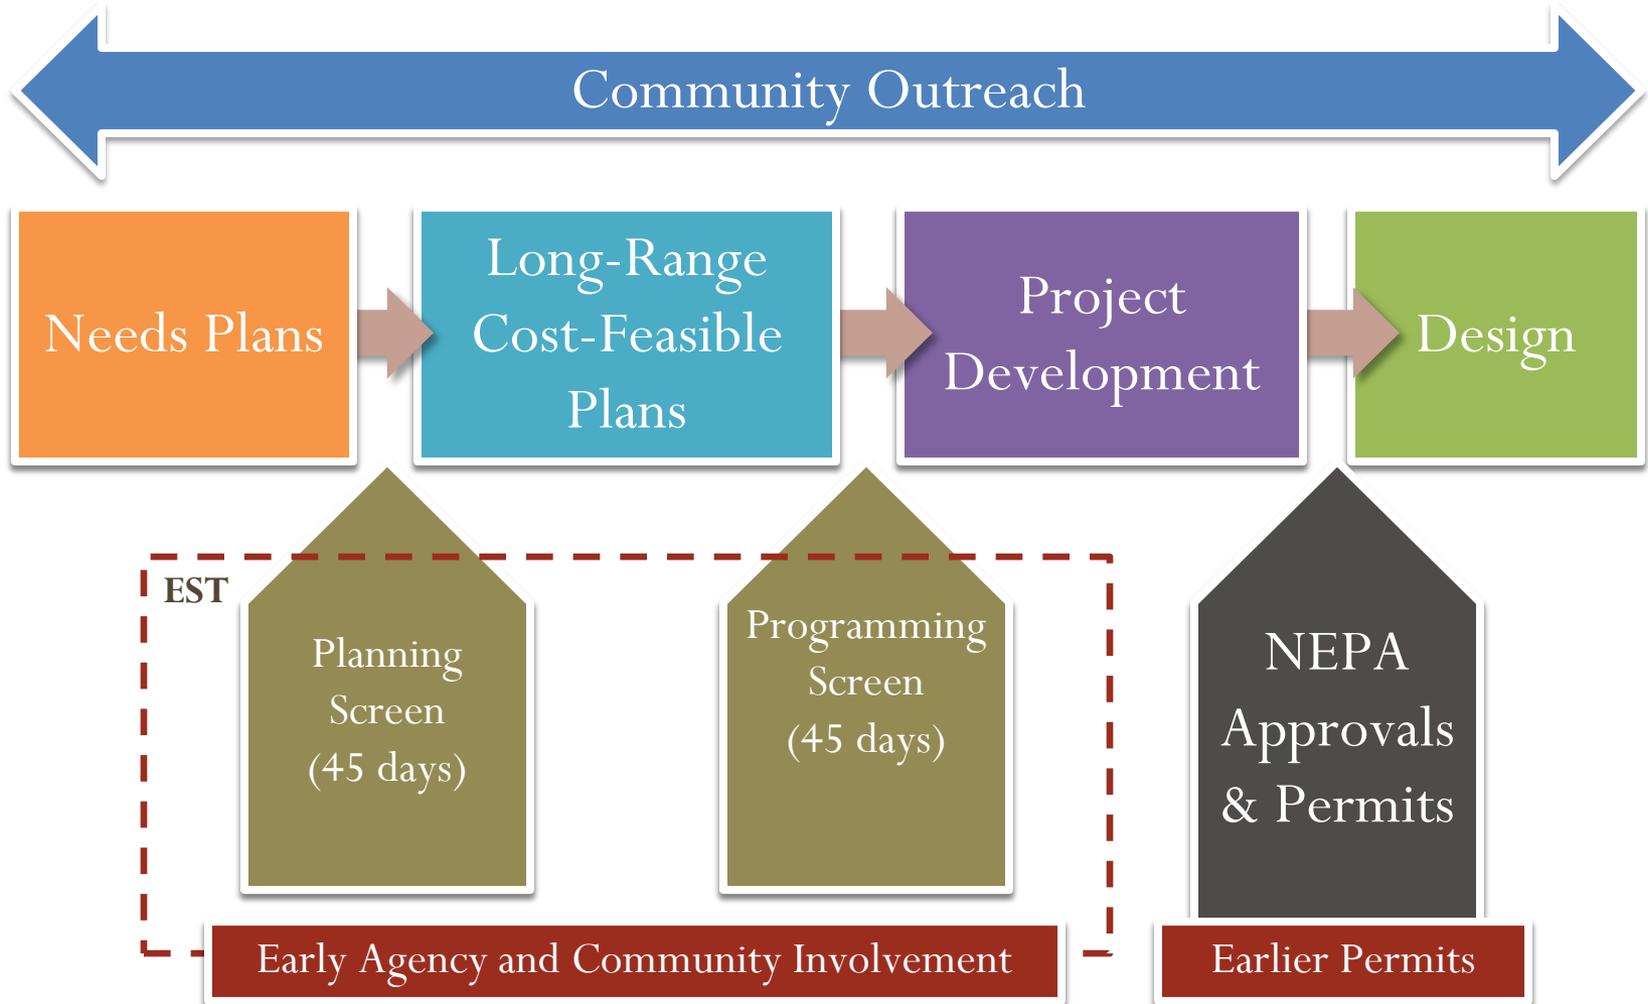

Outline

- ◆ When does ETDM Process occur?
- ◆ Screening Events
 - Planning Screen
 - Programming Screen
- ◆ EST Overview
- ◆ Questions

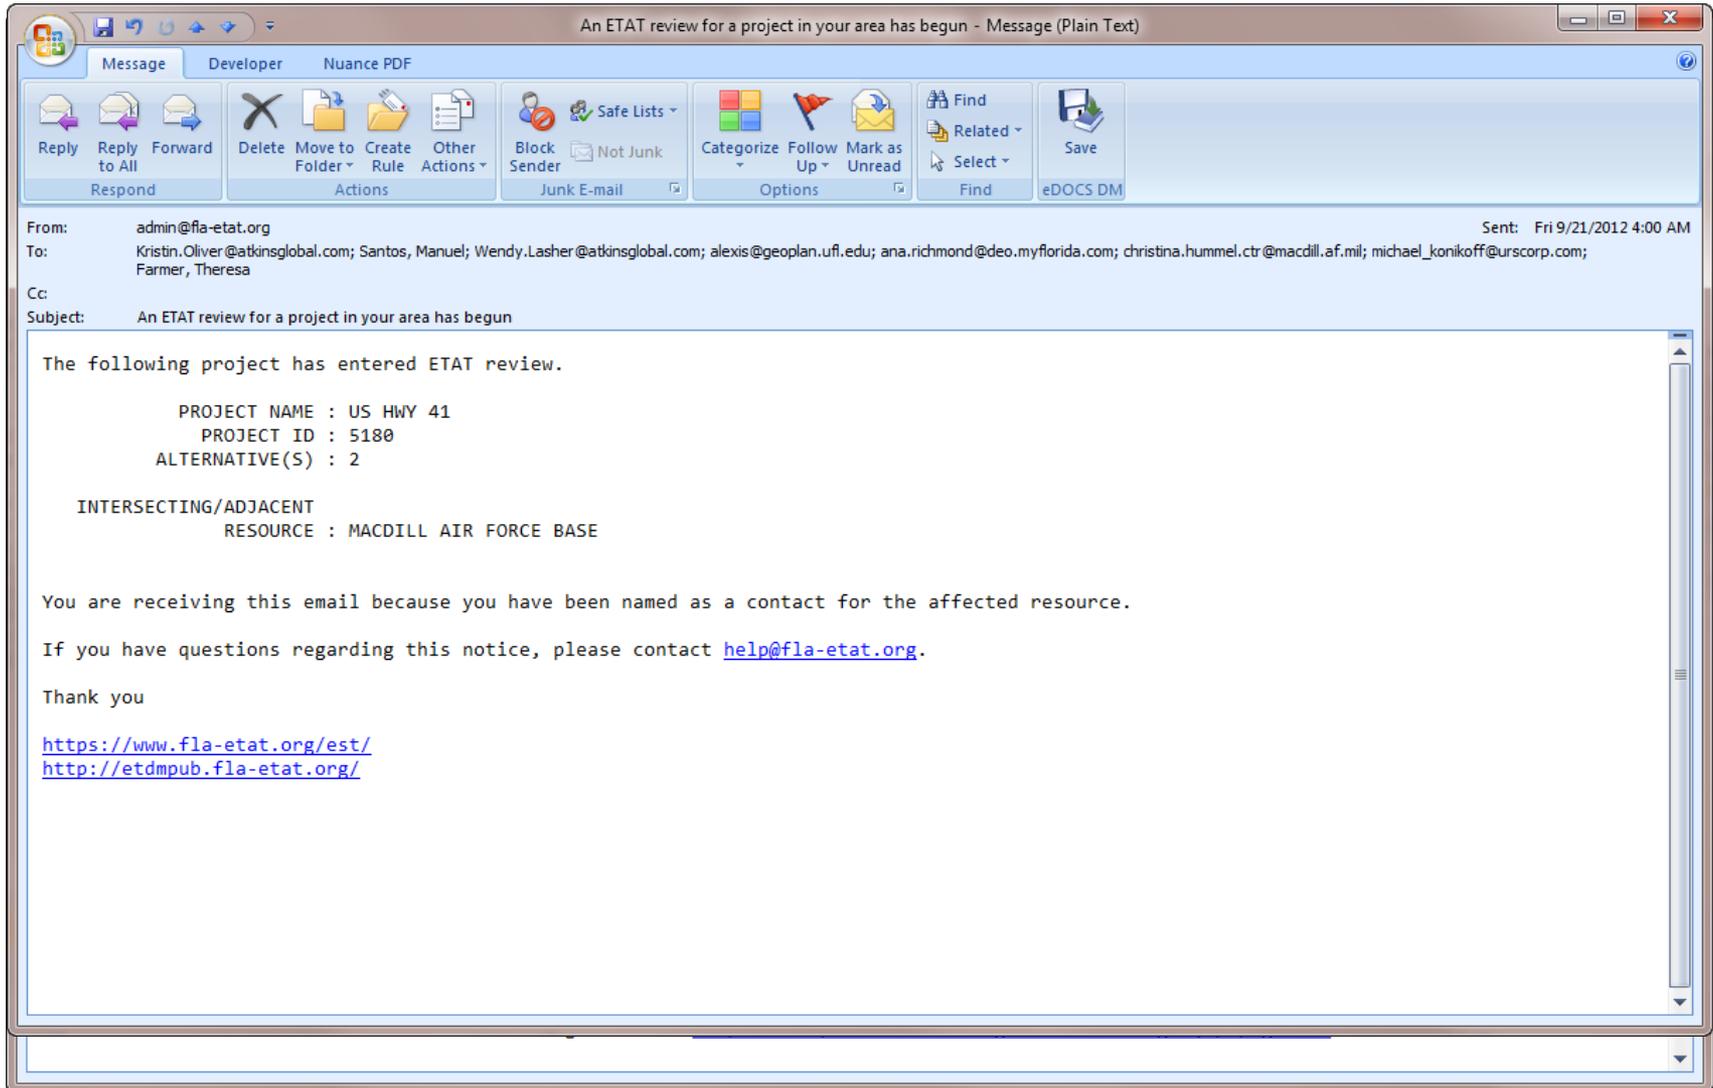

When does the evaluation occur?

ETDM Process Overview

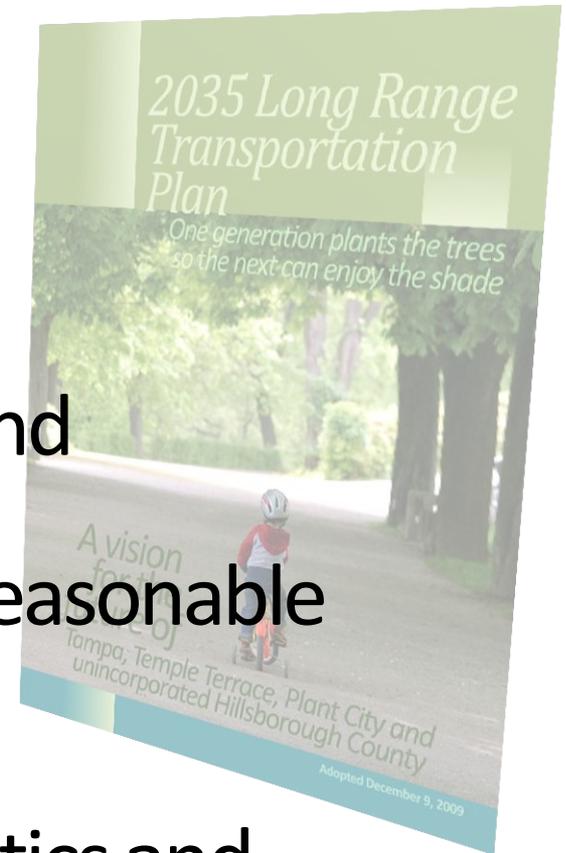

Notifications

What is the Planning Screen?

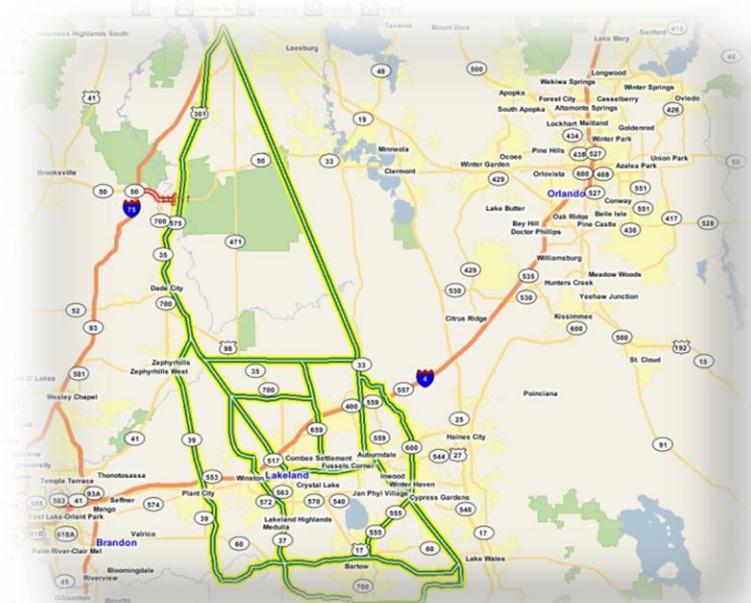

What decisions are we hoping to make through this screening?

- ◆ Understanding of
 - Purpose and need
 - Affected environment
- ◆ Agreement on mode
- ◆ Initial identification of fatal flaws and controversies
- ◆ Development and refinement of reasonable alternatives
- ◆ Inform our Cost Feasible Plans
- ◆ Document community characteristics and concerns

Developing Purpose and Need

- ◆ *Purpose*: why the project is being proposed
- ◆ *Need*: describes the problem(s) to be addressed by the project (not a statement of a solution)
- ◆ Must not be so specific as to “reverse engineer” a solution
- ◆ Agencies and the Public can consider and provide input to the Purpose and Need
- ◆ The Purpose and Need will be refined in PD&E to include project specific data

What do we know?

It depends on:

- ◆ What type of project?
 - New vs. Existing
 - Urban vs. Rural
- ◆ What plan is it coming from?
- ◆ How much work has been completed (or not)?

Share what we know

- ◆ The tool provides a window to what the FDOT knows – supplement the tool with your expertise.
 - Development of Preliminary Environmental Discussion (PED)s
 - Talk to your planners, environmental specialists, MPOs, etc.
- ◆ Preliminary resource information
 - GIS Analysis results are already a part of the project record – supplement with local knowledge

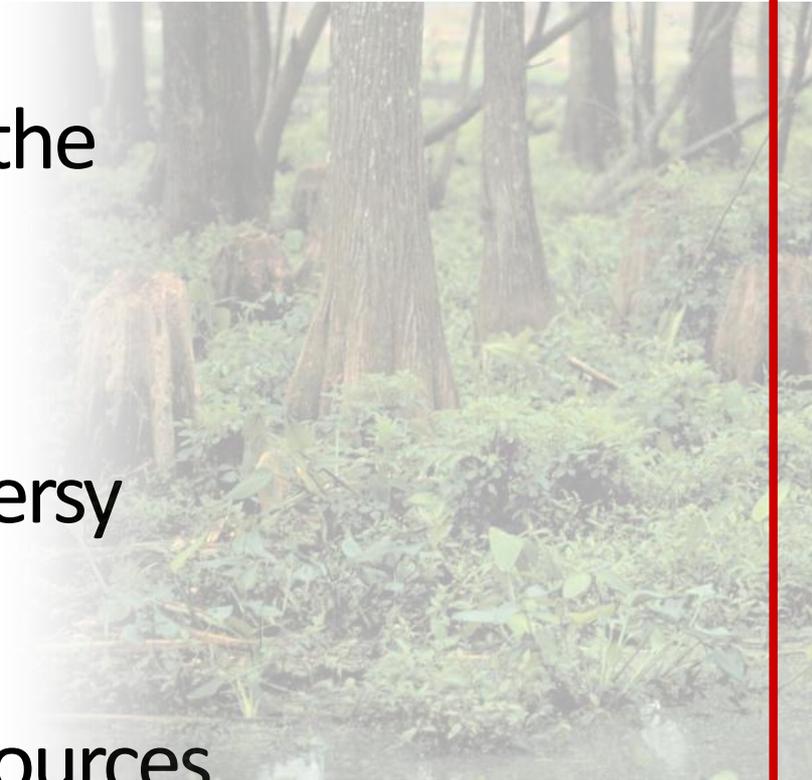

The image is a composite of three parts. On the left is a screenshot of a GIS Analysis Report. The report title is "GIS Analysis Report" and the project is "43351 SR 50 (Cortez Boulevard) from Lockhart Road to US 301". It shows an "Alternative #1 Summary" with a table of land use data. In the center is a photograph of five people (three men and two women) sitting around a table in a meeting room, looking at documents. On the right is a screenshot of a GIS map interface showing an aerial view of a road corridor with white outlines of parcels and a yellow/orange highlighted road path. The map interface includes a toolbar with "Plan", "Zoom In", "Zoom Out", "Identify", and "Clear" buttons, and a scale of 1:12293.

Description	100 Ft.		200 Ft.	
	Acr	Pct	Acr	Pct
ADCREAGE NOT ZONED FOR AGRICULTURE	0.0	0.03%	5.1	1.47%
AGRICULTURAL	4.0	2.92%	49.5	14.0%
INDUSTRIAL	0.0	0%	0.7	0.2%
INSTITUTIONAL	0	0%	4.1	1.17%
MIXED	1.0	1.04%	5.5	1.6%
OTHER	0.1	0.05%	0.4	0.11%
PARCELS WITH NO VALUES	1.5	0.89%	5.0	1.45%
PUBLIC/SEMI-PUBLIC	0.0	0.35%	12.4	3.57%
RECREATION	0.0	0%	4.4	1.28%
RESIDENTIAL	1.4	0.73%	11.7	3.51%

ETAT Responsibilities

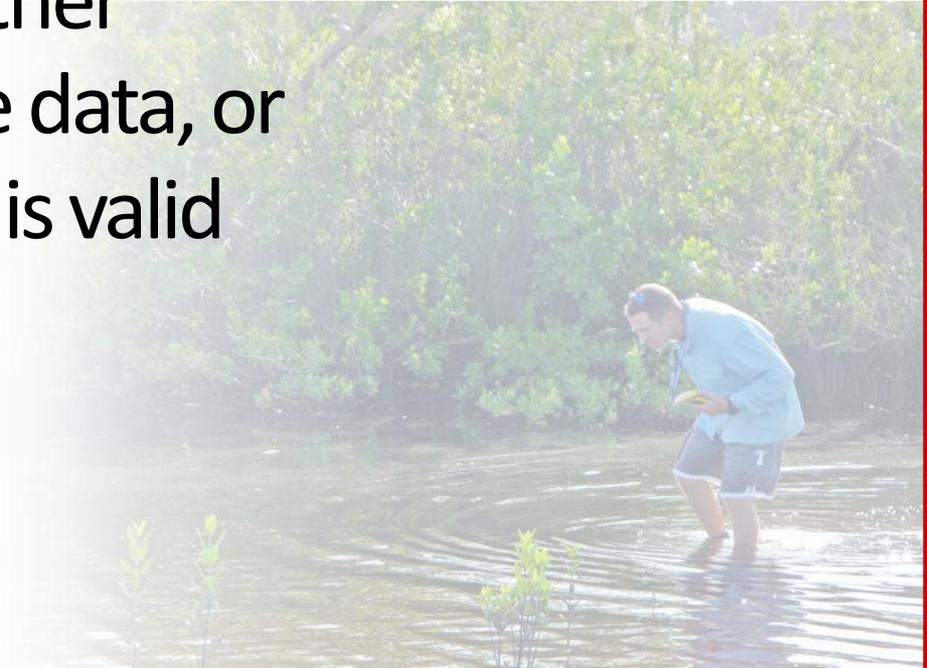

What do we need from the ETAT?

- ◆ Actionable comments
 - Tell us where NOT to place the improvements
 - Fatal flaw analysis
 - Identify a potential controversy
 - Provide solutions
- ◆ Tell us about any plans for resources

What are we looking for?

- ◆ Looking to the ETAT to either
 - (A) fill in the gaps in the data, or
 - (B) agree that the data is valid
- ◆ Personal knowledge
 - of the area
 - of the resource
- ◆ Actions
 - Tell us what you need – be specific
 - Identify activities we can complete between screening events to answer any questions

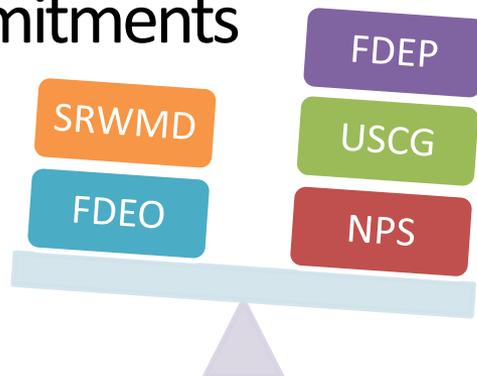

Examples of types of activities

- ◆ Seasonal studies
- ◆ Preliminary site inspections
- ◆ Studies to further define or justify the Purpose and Need

Summary Report

- ◆ Resource to Project Managers, ETDM Coordinators, Consultants, future team members, and future phases
- ◆ Feedback document summarizing project review
- ◆ Coordinate with District
 - Summary DOEs
 - Summary of Public Comments
 - Commitments

ETDM Summary Report

Project #13312 - Hillsborough Avenue

Finalized Programming Screen - Published on 11/16/2011

Generated by Steve Love (on behalf of FDOT District 7)

Printed on: 1/12/2012

Table of Contents

Chapter 1 Overview	2
Chapter 2 Project Details	3
2.1. Project Description Data	3
2.2. Purpose & Need Data	3
Chapter 3 Alternative #1	5
3.1. Alternative Description	5
3.2. Segment Description(s)	5
3.3. Project Effects Overview	5
3.4. ETAT Reviews and Coordinator Summary: Natural Issues	6
3.5. ETAT Reviews and Coordinator Summary: Cultural Issues	20
3.6. ETAT Reviews and Coordinator Summary: Community Issues	21
3.7. ETAT Reviews and Coordinator Summary: Secondary and Cumulative Issues	23
Chapter 4 Eliminated Alternative Information	25
4.1. Eliminated Alternatives	25
Chapter 5 Project Scope	26
5.1. General Project Commitments	26
5.2. Required Permits	26
5.3. Required Technical Studies	26
5.4. Class of Action	26
5.5. Dispute Resolution Activity Log	26
Chapter 6 Project-Level Hardcopy Maps	27
Appendices	48
7.1. Degree of Effect Legend	48
7.2. GIS Analyses	48

OK . . . What's next?

- ◆ Transition to District (MPO projects)
 - Refine project information based on ETAT comments
 - Follow through – advance studies
 - Identify activities to clarify or address questions
 - Initiate efforts to clarify or resolve “Potentially Disputed” and “Substantial” issues
 - Prioritize

The screenshot displays the Environmental Screening Tool (EST) web interface. The main content area shows a 'Summary Report' for project #12617, 'Indiantown Road/SR 706 (Jupiter Farms Road to west of Florida's Turnpike)'. The report includes a table with the following data:

Field	Value	Field	Value
District	District 4	Phase	Planning Screen
County	Palm Beach	From	Jupiter Farms Road
Planning Organization	Palm Beach MPO	To	West of Florida's Turnpike
Plan ID		Financial Management No.	
Federal Involvement	Federal Action Federal Funding		
Contact Information	Name: Vinod Sandarasamy Phone: (561) 684-4170 E-mail: VSandara@pbogov.org		

Below the summary report is an 'Overview' section with a legend and a color-coded bar chart. The legend includes categories like 'Air Quality', 'Coastal and Marine', 'Contaminated Sites', 'Floodplains', 'Hazardous Waste', and 'Special Designations'. The bar chart shows various impact levels across these categories.

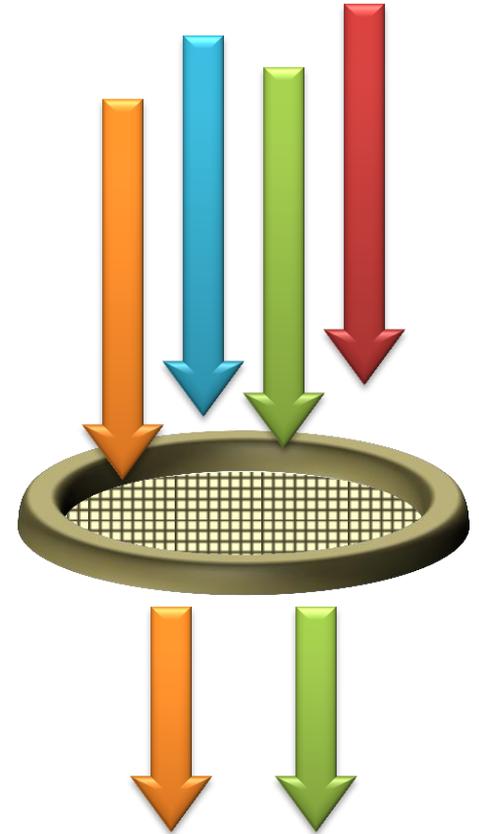

At the bottom, there is an 'ETAT Review Overview' table:

Issue	Degree of Effect	Organization	Date Reviewed
Air Quality	None	US Environmental Protection Agency	01/02/2010
Coastal and Marine	Moderate	National Marine Fisheries Service	12/16/2009
Contaminated Sites	Minimal	US Environmental Protection Agency	01/02/2010
Contaminated Sites	Minimal	FL Department of Environmental Protection	12/23/2009
Floodplains	Minimal	Natural Resources Conservation Service	11/20/2009
Floodplains	None	US Environmental Protection Agency	01/02/2010
Navigation	None	US Coast Guard	12/08/2009
Navigation	Moderate	US Army Corps of Engineers	11/20/2009
Special Designations	Substantial	US Environmental Protection Agency	01/02/2010

What is the Programming Screen?

What decisions are we hoping to make through this screening?

- ◆ Support AN
- ◆ Identify potential avoidance, minimization and mitigation opportunities
 - Direct, Indirect, and Cumulative Effects
- ◆ Fill data blanks
- ◆ Develop PD&E scope
- ◆ Accept purpose and need
- ◆ Potentially eliminate alternatives
- ◆ Highlight critical path issues
- ◆ Obtain Federal consistency determination (incl. local government comprehensive plan)
- ◆ Provide considerations for class of action determination
- ◆ Planning Consistency

ACE Project

- ◆ Continuing from Planning
 - Refining planning results to support detailed NEPA analysis
 - Might be refining your methodology and/or alternatives
 - Identify reasonable alternatives
- ◆ Starting with Programming
 - Developing corridors
 - Developing methodology
 - Identify reasonable alternatives

AN Package

- ◆ Communication Tool
 - Telling what we know
 - Providing context
 - Setting the scene
 - Plain language
 - Focus the ETAT
- ◆ Development of PED
 - Summary DOEs (if planning screen completed)
 - Access to GIS Analysis results

Consistency

- ◆ FDEP Clearinghouse – federal funding eligibility
- ◆ Planning consistency met before final environment document decision approved by FHWA
- ◆ Begin establishing consistency in EST
- ◆ Project seeking approval consistent with:

- LRTP
- TIP
- STIP
- Consistency spreadsheet

Planning Consistency Status

As information becomes available, please complete the fields below to establish project consistency between approved LRTP and STIP/TIP. The information in this section is required for FHWA for NEPA approval. However, the information in this section is optional for the EST. Only completed fields will appear in reports.

For additional guidance, see <http://www.dot.state.fl.us/planning/policy/metro-support>

Are the limits consistent with the plans?
 Yes
 No
 Unknown

Currently Adopted CFP-LRTP?
 Yes
 No
 Unknown

Original PD&E FAP#
FAP# assigned to the PD&E, if applicable

Identify MPOs (if applicable)
Selected MPOs: None
List of MPOs is based on [selected counties](#).

ETAT Responsibilities?

Detailed, actionable comments;

- ◆ You're helping to build a project scope of service
 - What do we need to do? Be specific
- ◆ You're helping us identify the range of reasonable alternatives.
 - Providing specific details about each presented alternative help with this process.

What information do we need?

- ◆ Help us minimize and avoid impacts
- ◆ Identify potential mitigation opportunities
- ◆ Provide information not in the Tool
 - For instance, what's important that resource or issue
 - Use agency-specific data
 - Co-workers and other agency staff
 - Historic files not in a database
 - Supplement with
 - Personal knowledge
 - Site visits
 - Permits (conditions)
 - Studies during NEPA

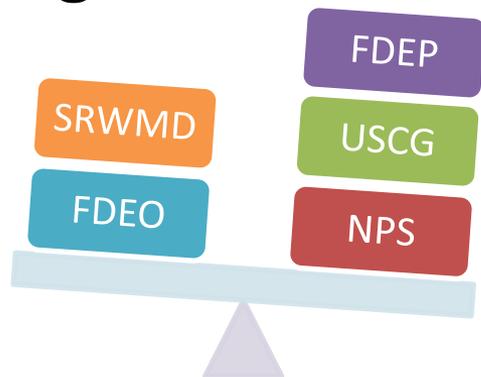

Summary Report

◆ Preliminary and Final

- Resource to Project Managers
- Feedback document summarizing project review
 - Summary DOEs
 - Accepted P&N
 - Project Scope

◆ Final

- Signed Class of Action

Summary Report Data Options

Report Version Selected

- Programming Screen Summary Report Published on 11/18/2008 by Richard Fowler
- This is considered a **Preliminary** Programming Screen Summary Report because the Class of Action has not been completed.
 - No Class of Action is defined.

Help

This site provides public access to information about proposed transportation projects, agency comments on a variety of environmental and socioeconomic issues associated with those projects, and various reports associated with the ETDM Process and specific projects.

To view information about a specific transportation project or group of projects, use the "Find a Project" feature on the Welcome

Thank you for visiting the Efficient Transportation Decision Making (ETDM) Web site. This site makes information available about proposed transportation projects, agency comments on a variety of environmental and socioeconomic issues associated with those projects, and various documents describing the ETDM Process.

Learn more about the ETDM Process by reading the Overview paper found under the "ETDM Program Information" pull-down. Then explore more detailed information about the ETDM Process under the "Project Search" menu (for example, a glossary of ETDM terms and the Document Library).

To find a proposed transportation project in the ETDM Process, use the "Project Search" feature on this page. If you know the ETDM number assigned to the project, select the "Project Number" search option, then enter the project number and press "go." Projects can also be found by typing in the Project Name, Planning Organization, the County or FDOT District where the project is located. Select one of these options from the "Project Search" menu, type in the pertinent information, and then press "go."

After selecting a project of interest, use the "View Interactive Map" option or the "Project Information" pull-down menu to view specific information about the project. The "Project Information" menu includes printable standard maps created for the selected project in PDF format. It also provides access to an interactive map viewer, which allows you to query the data on the map and change which features are shown on the map. In addition, the menu also includes various reports that describe the selected project and its alternative conditions, comments received from the Environmental Technical Advisory Teams (ETAT) and data queries identifying natural, cultural and community resources in the project vicinity.

Sign up to receive site updates and emails about projects as they move through the ETDM process. Register on the "Subscribe/Unsubscribe" page found in the "Welcome" pull-down menu.

Notice as you open pages, the Help box at the bottom left-hand corner of the site changes to provide a description and instructions for the page you are on. Other information (such as how to contact us, a list of Frequently Asked Questions, and a Site Map) can be accessed via the "Welcome" pull-down menu. The bottom toolbar provides quick links to a site map, ETDM contact information and the FDOT Internet privacy statement.

If you need further assistance using the ETDM Web site, please contact us at the ETDM Help Desk by emailing publicheb@fa-etat.org or calling (850) 414-5334.

what's new

- 10/16/2012: The following new or updated GIS layers have been added to the EST: Corresponding EST maps, hardcopy maps, analyses and metadata have been updated. EST data layers that are public access are available for download from the FGDL. However, data layers are not always immediately available in the FGDL; there may be a short lag time between when layers are added to the EST and ...
- 10/15/2012: You will notice a number of improvements when you log on to the EST. We simplified both the design of the site for easier navigation, as well as the design of a number of reports so they will be easier to read and print. Over time, we will apply these style changes to all other tools and reports. We also synchronized the issue and issue categories used by both the PD&E and ETDM Processes...
- 10/11/2012: This weekend we are making a number of enhancements to the EST to simplify its design and improve its functionality. While we are making these changes the EST will be unavailable. The review period for ETDM Project #13185 Atlantic Boulevard Realignment closes Monday, October 15, 2012. Please try to submit your ...
