Emergency Bridge Repair on Tice Street Overpass

Ft. Myers, FL – All four southbound I-75 lanes are open to traffic near the Tice Street overpass (mile marker 140). The right (outside) lane and shoulder will be closed again Friday March 11th from 9 a.m. to 1 p.m. while crews work to complete the repairs to the Tice Street overpass.

Tice Street is open to motorists as work to repair damage to the deck has been completed. Crews continued work to repair the beams supporting the overpass Thursday and will complete that work Friday.

Motorists are urged to plan extra travel time. Please use caution and drive with care.
