

Florida Method of Test
for
DENSITY OF SLURRY (MUD WEIGHT)

Designation: FM 8-RP13B-1

FM 8-RP13B-1 is identical to ASTM D 4380 except that the mineral slurry to be tested shall consist of processed attapulgite or bentonite clays, and the temperature of the slurry (using a 0-105°C thermometer) shall be measured and recorded on the Drilling Mud Report form.
