

WHY IT'S IMPORTANT

Transportation investments contribute to our quality of life while affecting the human and natural environment in both positive and negative ways.

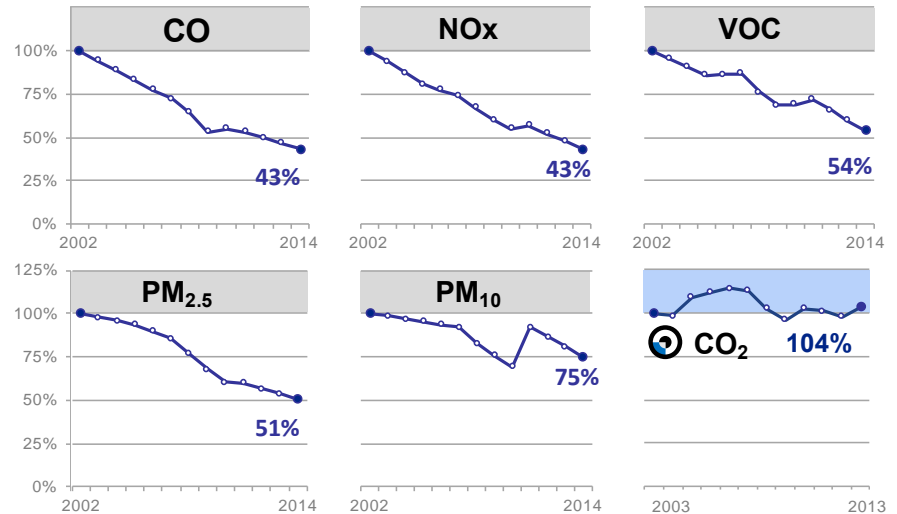

Air Quality

CORE MEASURE

Air quality is FDOT's core measure for the environment. How we move people and goods impacts air quality. Air quality is vital to public health and wellness. Standards are established by the Clean Air Act.

Emissions Trends for Highway Vehicles (Relative to 2002)

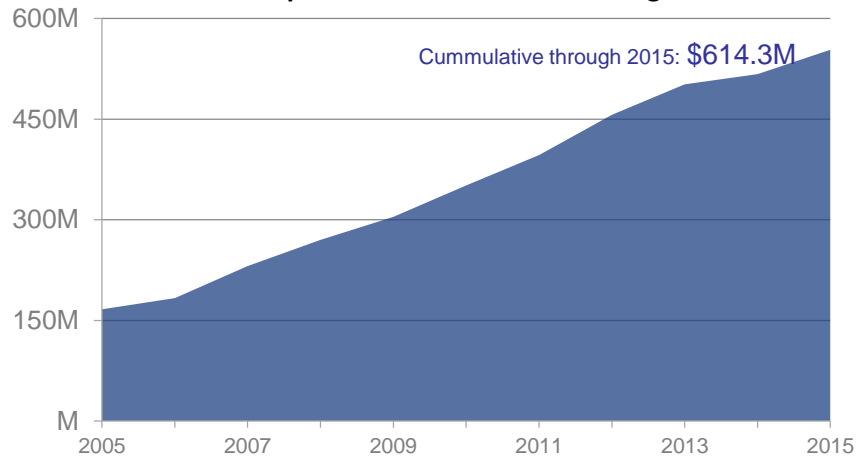

Transportation Alternatives

SUPPORTING MEASURES

FDOT supports community visions and values through projects such as bicycle and pedestrian improvements, Safe Routes to Schools, recreational trails, and other enhancements.

Transportation Alternatives Funding

Satisfaction with Florida Highways

SUPPORTING MEASURE

FDOT appreciates that the travel experience itself has significant value for transportation system users. Residents spend a considerable amount of time on Florida roads. For visitors, the State Highway System (SHS) plays a vital role in the impression formed of our state.

Percent of Residents and Visitors Satisfied with the SHS
