Re: Modification of Historical Bid Item Summary Report

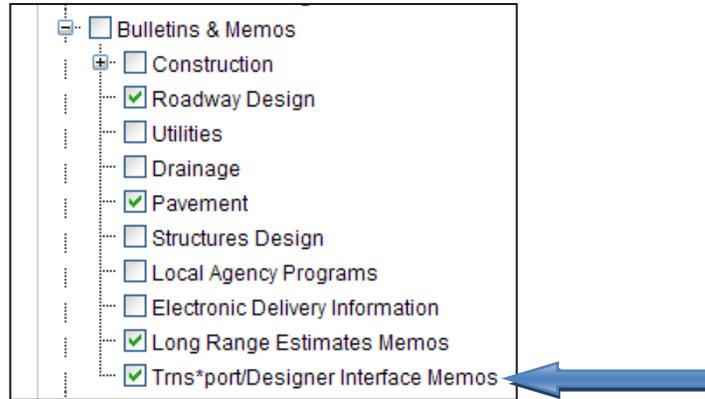

ISSUE / BACKGROUND: In recent years, the number of valid bidders has increased significantly. The bidders have been increasingly meeting the range of acceptable bids. For this reason, the Historical Bid Item Summary report has been revised to display all valid bids and also display irregular (in red) bids. The irregular bids will be displayed along with the valid bids, but will not be included in calculating the weighted average. If the number of bidders that need to be shown on a page exceeds the width of that page, the report header information will be extended to another page for printing of those remaining bidders on the next page(s).

If you have any questions concerning this issue, please contact me at:
