Comments:

Am I to assume that we will no longer allow aluminum guardrail on FDOT projects as we are deleting the entire specification?

Response: References to aluminum guardrail elements were removed from the Design Standards in 2004. The spec is being updated to match the Standards.

Comments:

Proposed specification should be called Steel Guardrail instead of Aluminum Guardrail.

Response: Section 967-2, which is being deleted, is (was) titled Aluminum Guardrail. Section 9967-1, Steel Guardrail, will remain.
