Comment: (5-13-14)

1. 916 – 1.1 Requirements: Recommend changing 916-1 to Section 916 in the first paragraph. Don't they also need to meet 916-4 and 916-5?

Response: Thank you for the comment. The intent of that statement was to address the materials requirements for binders and not reference the Approved Products List and QC Program requirements. Therefore the sentence was modified to the following: "...shall meet the **material** requirements of 916-1...."

2. 916 – 2.2 Certification and Verification: Delete the comma after certification in the above sub-section title. Recommend changing "conformance with 916-2" to "conformance with Section 916." Same reason as comment 1.

Response: Thank you for the two comments. Regarding the first comment, the comma was removed. Regarding the second comment, the intent of that statement was to address the materials requirements for emulsions and not reference the Approved Products List and QC Program requirements. Therefore, the sentence was modified to the following: "...is in conformance with **the material requirements** of 916-2...."

3. 916 – 5.3 Specification Compliance and QC Testing: Recommend changing "in accordance with 916-1 and 916-2" to "in accordance with Section 916." Same reason as comment 1.

Response: Thank you for the comment. The intent of that statement was to address the materials requirements. Therefore, the sentence was modified to the following: "...in accordance with **the material requirements** of 916-1 and 916-2...."
