7-7.2 – “...(2) lower ~~weights~~ weight limits legally established...”

Response: Agree, “limits” added.
Change made.

Comments: (10-14-13)

The link for the Manual was deleted. Can one be added back?

Response: The Specifications Office prefers not to include non-FDOT links in specifications as the Department has no control over these links. The title of the manual is supplied and can be searched for on the internet.
No change made.

0070702: 7-7.2 Instead of saying “including a Department owned Temporary bridge” it can say “including temporary bridge” because it could be owned by any local government.

Response: Disagree. The only bridging that the Department is concerned about for the purpose of this revision is that which is owned by FDOT.
No change made.
