Comment: (11-18-13, Internal)

The first sentence seems to be missing a verb.

Response: You are correct. Highlighted text added.

SUBARTICLE 102-11.21 is deleted and the following substituted:¶

→ **102-11.21 Temporary Raised Rumble Strips:** The quantity to be paid for will be the number of ~~calendar days, or portions thereof, that~~ temporary raised rumble strip sets **are** certified as installed/used on the project ~~on any calendar day or portion thereof~~ within the Contract Time. ~~The number of strips used must meet the requirements of the Design Standards, Index No. 600. No adjustment will be made to the per day measurement for the number of strips or sets used, or the number of times the sets are relocated.~~¶

Change made.

Does this section include MOT for bikes and peds? I don't see anything that mentions 'longitudinal channelizing devices' or other elements needed to 'control' passage of pedestrians through/around a work zone. Is that another spec?

Is it really necessary to include the sentence stating “The number of strips used must meet the requirements of the Design Standards, Index No. 600.”? This is already covered in Subarticle 102-9.1 which states “Install and maintain temporary traffic control devices as detailed in the Plans, Index 600 of the Design Standards and ...” Thank you for the opportunity to provide comments.

Remove the word "sets" (**highlighted text below**) from the paragraph and pay item.

102-11.21 Temporary Raised Rumble Strips: The quantity to be paid for will be the number of *calendar days, or portions thereof, that* temporary raised rumble strips **sets** *are* certified as installed/used on the project ~~on any calendar day or portion thereof~~ within the Contract Time. *The number of strips used must meet the requirements of the Design Standards, Index No. 600. No adjustment will be made to the per day measurement for the number of strips or sets used, or the number of times the sets are relocated.*

Item No. 102-150- Radar Speed Display Unit - per each per day.

Item No. 102-909- Temporary Raised Rumble Strips **Sets** *- per day.*

~~Item No. 102-910- Temporary Raised Rumble Strip Set - per set per day~~

A definition for a set should be given. Is a set the number of strips required at each location or for the entire setup.

Response: This information is provided in Design Standards, Index No. 600 (page 4 of 13).
No change made.

D4 Const.

Comment: (12-20-13)

No adjustment will be made to the per day measurement for the number of strips or sets used..."

Second sentence: Not sure why we need this part of the sentence. We tell them they have to follow the standards. I do think the standards should be clarified to show where we use the 3 strip set and 4 strip set. The 2013 standard is silent.
