

9310102 Metal Accessory Materials for concrete pavement and concrete Structures
COMMENTS FROM INTERNAL/INDUSTRY REVIEW

Gevin J. McDaniel, P.E.
Senior Structures Design Engineer

Comment: (10-17-13) The ASTM requirements should only be listed in Section 931. All other sections should refer to 931 instead of the ASTM.

Response: I agree with the comment and propose changes in Section 931 as follows

Section 931 is expanded as follows:

931-3.6 Materials: *The wire for the welded assembly shall be in accordance with all applicable requirements of ASTM A1064.*

After fabrication, apply one coat of alkyd primer meeting the material requirements of SSPC Paint 25 to all exposed surfaces of the assembly. Apply the primer in accordance with the manufacturer's recommendations.

931-4 Wire for Site Cage Machines

The wires for site cage machines shall meet the requirements of ASTM A 1064 or ASTM A706.
