Comments: (11-13-14)

Should include a clause that exempts the department from issuing additional time during a PIP's resubmittal review/approval.

Response: Any additional language of that proposed in the original spec revision, is a change that would require a round of checking with the districts and another round of internal and Industry review. In any case, the additional clause should not be necessary. DB article 455-10.2 clearly states the time lines for submittal/resubmittal reviews and as long as these times are not exceeded the Contractor cannot claim any additional time. No Changes made.
