Should this statement remain? (The longitudinal distance between bumps shall be approximately 30 inches.) or should the spec include a minimum and a maximum distance between bumps?

Response: You are correct; the sentence should not have been deleted.
Change made.

Profiled Thermoplastic Pavement Markings” will be allowed on concrete surfaces only and will be governed by the 701 Specifications. Which Specification will govern audible and vibratory pavement markings installed on asphalt?

Response: The rumble strip will be under Section 546 and the thermoplastic will be under Section 711.
No changes made.
