In Section 919-2 General Requirements it states that the ground tire rubber that is used shall be listed on the APL. However, it does not state this for pelletized asphalt rubber. I recommend revising the first sentence in the third paragraph under General Requirements to say that “The ground tire rubber or pelletized asphalt rubber used shall be one of the products listed on the Department Approved Product List (APL)” or “All products supplied under this Specification shall be one of the products included on the Approved Product List (APL)”.
