Comments: (11-25-15)

A certification requirement needs to be added to Section 942-3. The products are not marked with the APL number and they are typically supplied by the precast facility, not the manufacturer. Therefore, the contractor needs to provide to the Engineer a manufacturer's certification, conforming to the requirements in Section 6, that the product meets the requirements of this specification when used.

Response: This change is not within our scope of changes. It will be considered at a later date.  
No change made.
