

IDS - REVISION HISTORY

- I.3..... Updated for new process.
- Index 289 Revised Data Table. Added guidance on use of Type 1 and Type 2 Box Culvert Extensions. Added note to consider providing additional reinforcing bars parallel to the joint for culvert extensions on skewed boxes to provide a load path for transverse forces.
- Index 402 Removed guidance for plan notes regarding Bridge Name/Date Plate(s). These notes are now in the Design Standard Drawing.
- Index 403 Added reference to SDG 6.7.4.
- Index 411 Removed Payment note.
- Index 424 Relocated sentence: "Define lengths of End Posts in Structures Plans Superstructure Sheets." from Design Criteria to Plan Content Requirements.
- Index 425 Minor text edits.
- Index 470 Added cross reference to SDG 2.2. Modified figure to allow for gutterline offsets of low as 13" for Schemes 3 thru 6 on Index 473 & 476.
- Index 480 Added cross reference to SDG 2.2. Reorganized figure for clarity.
- Index 825 Removed references to Index 826. Corrected reference to Index 5200. Clarification changes.
- Index 870 Reworded second sentence of second Paragraph of Design Assumptions and Limitations for clarity.
- Index 880 Reworded second sentence of second Paragraph of Design Assumptions and Limitations for clarity.
- Index 5200 Completely revised.
- Index 5210 Added guidance on use of Type 1 and Type 2 Junction Slabs.
- Index 6011 Added asterisk and note to clarify Plan View and Wall Control Drawings can go in either Structures or Roadway plans.
- Index 11870 Changed title. Clarified guidance on clearances. Added information for Undercut Anchors.
- Index 17515 Modified Design Weight and Equivalent Projected Area of Luminaire.
- Index 17725 Updated instructions to coordinate with completely revised Design Standard.
- Index 17743 Updated Title. Removed QPL references. Revised Figure 1, Data Table and Example Data Table.
- Index 17745 Deleted QPL reference. Added cross reference to Index 17743. Revised Data Table.

- [Index 20005](#) Removed references to AASHTO and Bulb-T beam standards. Added reference to FIB-84 and FIB-96 Beams. Added reference to Index 20512. Clarified limitations are for simple span pretensioned beams only. Revised Data Table. Updated Example Table values based on screed load factor changing from 1.25 to 1.5 in Beam Stability v1.01.
- [Index 20010](#) Deleted reference to SDM for Framing Plan requirements. Added reference to Index 20512. Revised Data Table.
- [Index 20199](#) Updated Title and removed references to AASHTO and Bulb-T beams. Added reference to FIB-84 and FIB-96 Beams. Revised Data Table.
- [Index 20210](#) Deleted reference to SDM for Framing Plan requirements in Design Criteria. Added strand configuration requirements to Plan Content Requirements.
- [Index 20299](#) Revised Data Table. Minor text edits.
- [Index 20510](#) Added references to Indexes 20084, 20096 and 20512.
- [Index 20511](#) Completely revised.
- [Index 20512](#) Completely revised.
- [Index 20600](#) Removed reference to EDC (Embedded Data Collectors). Revised Data Table. Added Pile Interaction Diagrams.
- [Index 20654](#) Revised Data Table.
- [Index 20660](#) Revised Data Table.
- [Index 20900](#) Relocated last paragraph of Design Assumptions and Limitations to Plan Content Requirements. Added new Paragraphs 3 and 4 to Design Assumptions and Limitations. Revised Data Table.
- [Index 20910](#) Relocated last paragraph of Design Assumptions and Limitations to Plan Content Requirements. Added new Paragraphs 3 and 4 to Design Assumptions and Limitations. Revised Data Table.
- [Index 21100](#) Revised Data Table.
- [Index 21210](#) Updated Title. Deleted references allowing conduits to be used by a utility owner. Added new 5th Paragraph to Design Assumptions and Limitations.
- [Index 21300](#) Relocated parameters for use of reinforcing bar list from Plan Content Requirements to Design Assumptions and Limitations.
- [Index 21600](#) Completely revised.
- [Index 21800](#) Completely revised.
