

FDOT District 7 & the RNC

**What do TSM&O and the
FDOT D7 effort for the
Republican National
Convention (RNC) have
in common?**

**It can be argued that the
FDOT District 7 “RNC
Effort” was a large, very
complicated and highly
successful “TSM&O”
project.**

TSM&O

Transportation Systems Management & Operations

TSM&O capitalizes on the full service potential and cost-effectiveness of a complete range of well-known strategies, such as:

- Arterial management
- Emergency/incident management
- Freeway management
- Special event management
- Work zone management
- Transit operations and management
- Traveler information
- Freight management
- Travel weather management
- Travel demand management

TSM&O strategies provide a consistent, extremely cost-effective way to deal with congestion. *TSM&O links planning and operations resulting in higher levels of involvement in planning and policy objectives that cut across modes and jurisdictions.*
