This Memo Has Expired

DCE MEMORANDUM NO. 08-05
(FHWA Approved: 5/3/05)

TO: DISTRICT CONSTRUCTION ENGINEERS

FROM: Ananth Prasad, Director, Office of Construction 

COPIES: Bob Burluson, William Nickas, Tom Malerk, Don Davis-FHWA, Steve Plotkin, David O'hagan

SUBJECT: CLARIFICATION OF A NOTE – 2004 ROADWAY STANDARD DRAWING 9535, SHEET 1 OF 3

The term "flowable concrete" in the 2004 Roadway Standard Drawing 9535 (Standard Roadside Sign Break-Away Panel Details), sheet 1 of 3, last note entitled "Foundations," should be "flowable fill". The current note reads as follows: The holes shall be filled with flowable concrete after the precast foundation is in place. It should read: The holes shall be filled with flowable fill after the precast foundation is in place.

Apparently there has been some confusion in the field about the intent of the subject note because of the incorrect term, so please notify all parties that need to be aware of this clarification. The new 2006 Roadway Standard Drawing has the correct term but there are jobs underway that are still using the 2004 version.

If you have any questions, please contact Steve Plotkin at (850) 414-4155 or (suncom 994-4155).
