

# THIS MEMO IS EXPIRED

February 29, 2000

## MEMORANDUM NO. 11-00

**TO:** DISTRICT CONSTRUCTION ENGINEERS

**FROM:** Greg Xanders, State Construction Engineer

**COPIES:** District Materials Engineers, District Geotechnical Engineers,  
Charles Goodman, Sastry Putcha, Doug Townes

**SUBJECT:** MANDATORY QUALIFICATION REQUIREMENTS

There has been some discussion in the DCE meetings and in the correspondence between us and the Districts that all the foundation inspectors should be qualified to inspect all driven piles and drilled shafts installations. Since the response to this suggestion has been positive, I am recommending the following:

All inspectors (FDOT and CCEI) monitoring pile foundation installation for all FDOT projects shall be qualified by attending and passing the FDOT Pile Driving Inspector's Qualification Course as of June 30, 2000.

All inspectors (FDOT and CCEI) monitoring drilled shaft foundation installation for all FDOT projects shall be qualified by attending and passing the FDOT Drilled Shaft Inspection Qualification Course as of January 1, 2001.

If you have any questions, please contact Sastry Putcha at suncom 994-4148.
