SUBJECT: CONTROL OF WORK - Subarticle 5-1.4.5.7 Beam and Girder Temporary Bracing

The second and third paragraphs of subarticle 5-1.4.5.7 were inadvertently omitted during compilation of Section 5 for the January 2014 eBook.

This issue has been corrected via the issuance of Mandatory Specifications Revision Number 6 to the July 2014 Workbook (refer to the links below) but needs to be implemented immediately by authority of this memorandum for all contracts let between January 1, 2014 and June 30, 2014. Project staff should review specification packages for all active contracts and if necessary process a specification change to incorporate this Mandatory Specifications Revision.

This memorandum should be attached to the Work Order or Supplemental Agreement used to document the change.
