Corridor Analysis Meeting on U.S. 90 Project Development and Environment Study

Chipley—The Florida Department of Transportation (FDOT) will hold a Corridor Analysis public meeting concerning the Project Development and Environment (PD&E) Study for widening U.S. 90 (State Road 10) from four to a six lanes with intersection improvements beginning at Scenic Highway in Escambia County and continuing to Glover Lane in Santa Rosa County. The meeting will be held Tuesday, December 6, 2016 from 5:30 p.m. to 6:30 p.m. CST at the Santa Rosa County Auditorium, 4530 Spikes Way, Milton.

This meeting is being held to present the initial engineering and environmental analysis to date and give the public an opportunity to provide comments concerning proposed improvements. Currently, FDOT proposes to widen the roadway from a four to six-lane divided roadway and improve drainage along the corridor. Other improvements include access management modifications, intersection improvements, and stormwater treatment ponds. There will be no formal presentation; however, maps, drawings and other study information will be on display. FDOT representatives will be available to answer questions. Additional project information may be viewed at: www.nwflroads.com/FutureProjects.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons who require special accommodation under the Americans with Disabilities Act, or persons who require translation services (free of charge) should contact Peggy Kelley, FDOT Project Manager, toll-free at (888) 638-0250, extension 1517 at least seven days prior to the meeting.
